This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

GREENLEAF'S

NEW COMPREHENSIVE SERIES.

An ENTIRELY NEW MATHEMATICAL COURSE, *Analytical and Practical, Progressive and Scientific, fully adapted to the best methods of modern instruction.*

GREENLEAF'S NEW PRIMARY ARITHMETIC.
GREENLEAF'S NEW ELEMENTARY ARITHMETIC.
GREENLEAF'S NEW, PRACTICAL ARITHMETIC.
GREENLEAF'S NEW ELEMENTARY ALGEBRA.
GREENLEAF'S NEW HIGHER ALGEBRA.
GREENLEAF'S ELEMENTS OF GEOMETRY.
GREENLEAF'S ELEMENTS OF TRIGONOMETRY.

☞ *Each book in the series is complete in itself.*

*** KEYS to PRACTICAL ARITHMETIC, ALGEBRAS, GEOMETRY, and TRIGONOMETRY, in separate volumes, *for teachers only.*

Entered, according to Act of Congress, in the year 1867, by
HENRY B. MAGLATHLIN,
In the Clerk's Office of the District Court of the District of Massachusetts.

In deference to the opinion of some good teachers, the editor of the New Practical Arithmetic has been disinclined, either to make, or authorize to be made, a Key to that work.

It appears, however, that there can hardly be a mathematical book of any considerable popularity without a Key in some form. Withholding such a help in this case from the teacher and private learner, has failed of the hoped-for result. It has given occasion for the manufacture of many manuscript keys, and their free use in the school-room.

It has, also, been found that many teachers desire ready access to omitted answers, and that not a few, who are in charge of many pupils, fail of time to examine in detail numerous arithmetical operations, without a hand-book of solutions.

In view of these facts, the preparation of this book, by a practical teacher, was sanctioned.

It gives omitted answers to exercises both in the New Elementary and New Practical Arithmetics. It furnishes operations to exercises in the latter book — not full solutions or entire analyses — so that, while it may be of aid to the teacher, it can hardly be of much avail to the pupil.

Any teacher who will promptly furnish his pupils with all needed assistance, and who has the moral power to enforce precepts, need not, it is believed, fear any surreptitious use of Keys in his school.

KINGSTON, MASS., May, 1867.

$3\frac{2}{3} = \frac{11}{3}$

$$\frac{121}{10} \div \frac{11}{3} = \frac{\overset{11}{\cancel{121}} \times 3}{10 \times \cancel{11}} = \frac{33}{10} = 3\frac{3}{10}, \text{ Ans.}$$

(10.) $\frac{7}{3}$ of $\frac{1}{3}$ of $2 = \frac{14}{9}$, and
$\frac{1}{3}$ of $\frac{9}{11}$ of $\frac{8}{3} = \frac{8}{11}$

$$\frac{14}{9} \div \frac{8}{11} = \frac{\overset{7}{\cancel{14}} \times 11}{9 \times \underset{4}{\cancel{8}}} = \frac{77}{36} = 2\frac{5}{36}, \text{ Ans.}$$

(11.) $\frac{1}{5}$ of \$3240 = \$648
$\frac{4}{5}$ = \$648 × 4 = \$2592
\$2592 — \$500 = \$2092, Ans.

(12.) In as many weeks as $\frac{2}{3}$ is found times in $31\frac{1}{2}$:
$31\frac{1}{2} = \frac{63}{2}$;

$$\frac{63}{2} \div \frac{2}{3} = \frac{63 \times 3}{2 \times 2} = \frac{189}{4} = 47\frac{1}{4} \text{ weeks, Ans.}$$

(13.) $\frac{3}{4}$ of $\frac{5}{6} = \frac{\overset{3}{\cancel{3}} \times 5}{4 \times \underset{2}{\cancel{6}}} = \frac{5}{8}$

$\frac{5}{6} \times \frac{5}{8} = \frac{25}{48}$, Ans.

(14.) $$\frac{\frac{3}{4}}{\frac{6}{5} \times \frac{5}{7}} = \frac{\frac{3}{4}}{\frac{6}{7}} = \frac{\overset{3}{\cancel{3}} \times 7}{4 \times \underset{2}{\cancel{6}}} = \frac{7}{8}$$

$$3\frac{7}{8} = \frac{31}{8}; \quad \frac{31}{8} \div \frac{9}{10} = \frac{31 \times \overset{5}{\cancel{10}}}{\underset{4}{\cancel{8}} \times 9} = \frac{155}{36}$$

$1\frac{3}{16} = \frac{19}{16}$; $(\frac{7}{6} + \frac{155}{36}) - \frac{19}{16} =$
$(\frac{126}{144} + \frac{620}{144}) - \frac{171}{144} = \frac{575}{144} = 3\frac{143}{144}$, Ans.

(15.) $$\frac{2+3}{3+3} = \frac{5}{6}, \text{ and}$$
$\frac{2}{3} = \frac{4}{6}$; $\frac{5}{6} - \frac{4}{6} = \frac{1}{6}$ increased, Ans.

(16.) $\frac{3+3}{2+3} = \frac{6}{5} = 1\frac{2}{10}$; and $\frac{3}{2} = 1\frac{5}{10}$

$1\frac{5}{10} - 1\frac{2}{10} = \frac{3}{10}$ diminished, Ans.

(17.) $100 \div 1\frac{7}{19} = \frac{100 \times 19}{17} = \frac{1900}{17} = 111\frac{13}{17}$, Ans.

(18.) If I pay away $\frac{1}{2}$, one-half will remain. If I then pay away $\frac{1}{3}$ of the remaining half, $\frac{2}{3}$ of $\frac{1}{2}$ will remain $= \frac{1}{3}$. If I then pay away $\frac{1}{4}$ of $\frac{1}{3}$, $\frac{3}{4}$ of $\frac{1}{3}$ will remain $= \frac{1}{4}$, Ans.

(19.) $120 - 30 = 90$

$\frac{1}{9}$ of $90 = 10$

$90 - 10 = 80$ remaining, and

80 is $\frac{80}{120}$ or $\frac{2}{3}$ of the original number.

(20.) $\frac{1}{8}$ of $1\frac{12}{31} = \frac{1}{8}$ of $\frac{43}{31} = \frac{43}{248}$, Ans.

(21.) $8\frac{3}{8} = \frac{67}{8}$, and $41\frac{7}{8} = \frac{335}{8}$

$\frac{335}{8} \div \frac{67}{8} = \frac{335}{67} = 5$ tons, Ans.

(22.) $31\frac{4}{5} \times 4 = 127\frac{1}{5}$

100 gallons $= \frac{100}{127\frac{1}{5}} =$

$\frac{500}{636} = \frac{125}{159}$ of the whole, Ans.

(23.) $\frac{9}{15} = \frac{3}{5} = \frac{24}{40}$

$\frac{24}{40} \div \frac{3}{40} = 8$, Ans.

EXERCISES IN ANALYSIS.

(PAGES 124–126.)

(2.) $\$210 \div 20 = \$10\frac{1}{2}$

$\$10\frac{1}{2} \times 27 = \$283\frac{1}{2}$, Ans.

(3.) $\$283\frac{1}{2} \div 27 = \$10\frac{1}{2}$; $\$10\frac{1}{2} \times 20 = \$210$, Ans.

(5.) $\frac{1}{4}$ of a pound will cost $\frac{1}{3}$ of \$.60 = \$.20
$\frac{4}{4}$, or 1 pound, will cost \$.20 × 4 = \$.80; and $553\frac{1}{4}$ will cost
\$.80 × $553\frac{1}{4}$ = \$442.60, Ans.

(6.) $\frac{1}{8}$ acre will cost $\frac{1}{3}$ of \$.75 = \$25
$\frac{8}{8}$, or 1 acre, will cost \$25 × 8 = \$200; and
$7\frac{4}{5}$ acres will cost \$200 × $7\frac{4}{5}$ = \$1560, Ans.

(7.) \$1560 ÷ $7\frac{4}{5}$ = \$200
$\frac{3}{8}$ of \$200 = \$75, Ans.

(9.) \$1 will buy $\frac{1}{7}$ of $5\frac{3}{8}$ =
$\frac{1}{7}$ of $\frac{43}{8}$ = $\frac{43}{56}$ bushels
\$15 will buy 15 times $\frac{43}{56}$ = $11\frac{29}{56}$ bushels, Ans.

(10.) $\frac{1}{9}$ of a ton will cost $\frac{1}{7}$ of \$5.60 = \$.80
$\frac{9}{9}$, or 1 ton, will cost \$.80 × 9 = \$7.20
540 ÷ 720 = $\frac{3}{4}$, Ans.

(11.) \$$11\frac{1}{2}$ ÷ $19\frac{1}{2}$ = \$$\frac{23}{39}$
$2\frac{7}{8}$ ÷ $\frac{23}{39}$ = $\frac{23}{8}$ ÷ $\frac{23}{39}$ = $4\frac{7}{8}$,

(12.) $33\frac{11}{12}$ ÷ $4\frac{5}{8}$ = $\frac{407}{12}$ ÷ $\frac{37}{8}$ = $\frac{\overset{11}{\cancel{407}} \times \overset{2}{\cancel{8}}}{\underset{3}{\cancel{12}} \times \cancel{37}}$ = $\frac{22}{3}$ = $7\frac{1}{3}$

\$$27\frac{1}{2}$ ÷ \$$7\frac{1}{3}$ = $\frac{55}{2}$ ÷ $\frac{22}{3}$ = $\frac{55 \times 3}{2 \times 22}$ = $\frac{165}{44}$ = $3\frac{3}{4}$, Ans.

(13.) $4\frac{2}{5}$ = $\frac{22}{5}$; $\frac{22}{5}$ ÷ 11 = $\frac{2}{5}$, and
$7\frac{1}{5}$ = $\frac{36}{5}$; $\frac{36}{5}$ ÷ $\frac{2}{5}$ = 18, Ans.

(15.) The man can do $\frac{1}{13}$ in one day, the boy $\frac{1}{10}$ in one day, and $\frac{1}{13} + \frac{1}{10} = \frac{10}{130} + \frac{13}{130} = \frac{23}{130}$ what both can do in 1 day. It will then take as many days to do $\frac{130}{130}$, or the whole, as $\frac{23}{130}$ is found times in $\frac{130}{130}$ = $5\frac{15}{23}$ days, Ans.

(16.) $\frac{1}{10} + \frac{1}{15} = \frac{3}{30} + \frac{2}{30} = \frac{5}{30} = \frac{1}{6}$
$\frac{6}{6} \div \frac{1}{6} = 6$ days, Ans.

(17.) The first will fill $\frac{1}{10}$ of it in one hour, the second $\frac{1}{15}$, and the third $\frac{1}{16}$
$\frac{1}{10} + \frac{1}{15} + \frac{1}{16} = \frac{24}{240} + \frac{16}{240} + \frac{15}{240} = \frac{55}{240}$; $\frac{240}{240} \div \frac{55}{240} = 4\frac{4}{11}$ hours, Ans.

(19.) $\frac{1}{2} + \frac{1}{3} = \frac{5}{6}$; $\frac{6}{6} - \frac{5}{6} = \frac{1}{6}$ remaining, therefore
$400 = $\frac{1}{6}$, and $\frac{6}{6}$, or the whole, $= 6$ times $400, or $2400
$2400 — $400 = $2000, Ans.

(20.) $\frac{3}{8} + \frac{5}{12} = \frac{9}{24} + \frac{10}{24} = \frac{19}{24}$
$\frac{24}{24} - \frac{19}{24} = \frac{5}{24}$, therefore, $75 = \frac{5}{24}$; $\frac{1}{24} = \frac{1}{5}$ of $75 = 15$;
$\frac{24}{24} = 24$ times $15 = 360$, whole number of sheep.
$\frac{3}{8}$ of $360 = 135$ in 1st pasture.
$\frac{5}{12}$ of $360 = 150$ in 2d pasture.

(21.) $\frac{2}{9} + \frac{2}{7} = \frac{14}{63} + \frac{18}{63} = \frac{32}{63}$
$\frac{63}{63} - \frac{32}{63} = \frac{31}{63}$; therefore, $2000 = $\frac{31}{63}$ of the cost of the mill, and $\frac{1}{63}$ of the cost $= $2000 \div 31 = $64\frac{16}{31}$; then $\frac{63}{63}$, or the whole cost, $= 63$ times $64\frac{16}{31} = $4064\frac{16}{31}$; then $\frac{2}{9}$ of $4064\frac{16}{31} = $903\frac{7}{31}$ is the sum A pays, and $\frac{2}{7}$ of $4064\frac{16}{31} = $1161\frac{9}{31}$ is the sum B pays.

(23.) If $\frac{3}{8}$ of the larger $= \frac{1}{2}$ the smaller,
$\frac{1}{8}$ of the larger $= \frac{1}{3}$ of $\frac{1}{2}$ of the smaller $= \frac{1}{6}$, and $\frac{8}{8}$ $= 8$ times $\frac{1}{6} = \frac{8}{6}$ of the smaller;
since $\frac{6}{6}$ = the smaller, $\frac{8}{6} + \frac{6}{6} = \frac{14}{6} = \frac{7}{3}$ of the smaller;
$\frac{1}{7}$ of $350 = 50$; then $\frac{3}{3}$, or the whole of the smaller,
$50 \times 3 = 150$; $350 - 150 = 200$ the larger;
or, if $\frac{1}{3} = 50$, $\frac{4}{3}$, or the larger $= 4$ times $50 = 200$, Ans.

(24.) Since the carriage is worth $2\frac{1}{2}$ times the horse, both together are worth $3\frac{1}{2} = \frac{7}{2}$ times the horse.

If \$420 is $\frac{7}{2}$ times the worth of the horse, $\frac{1}{7}$ of \$420 = \$60 is $\frac{1}{2}$ the worth of the horse, and \$60 × 2 = \$120 must be $\frac{2}{2}$ times, or his entire worth.

If both the carriage and horse together are worth \$420, and the horse be worth \$120, the carriage must be worth \$420 — \$120 = \$300, Ans.

(25.) Since the cost of the chaise is $\frac{1}{2}$ as much as the horse, the cost of both is $1\frac{1}{2} = \frac{3}{2}$ times the cost of the horse.

Since the cost of the harness is $\frac{1}{3}$ as much as the chaise and horse, it is $\frac{1}{3}$ of $\frac{3}{2} = \frac{1}{2}$ times the cost of the horse.

Then the cost of the three, \$300, is $\frac{3}{2} + \frac{1}{2} = \frac{4}{2} = 2$ times the cost of the horse, and $\frac{1}{2}$ of \$300 = \$150 must be the cost of the horse.

Since the cost of the chaise is $\frac{1}{2}$ as much as that of the horse, it must be $\frac{1}{2}$ of \$150 = \$75.

Since the cost of the harness is $\frac{1}{3}$ as much as the chaise and horse both, it must be $\frac{1}{3}$ of \$75 + \$150 = \$75, Ans.

$\$6.50 \div 1.04 = \$6.25$, Ans.

REVIEW EXERCISES.

(PAGE 202.)

(1.) 4 ft. = 48 inches.
If it falls short 3 inches, it falls short $\frac{3}{48} = \frac{1}{16} =$ [6¼ %, Ans.

(2.) $\frac{25}{1250} = \frac{1}{50} = 2$ %, Ans.

(3.) \$550 ÷ .05 = 11000, Ans.

(5.) 100 % + 10 % = 110 %;
\$.88 ÷ 1.10 = \$.80 cost;
\$1.00 — \$.80 = \$.20;
\$.20 ÷ \$.80 = .25 = 25 %, Ans.

(6.) 100 % — 12 % = 88 %;
\$132 ÷ .88 = \$150 cost;
\$159 — \$150 = \$9;
\$9 ÷ \$150 = .06 = 6 %, Ans.

(8.) 100 % + 25 % = 125 %;
20 % of 125 % = .25 %;
125 % — 25 % = 100 % cost.
Therefore, nothing is gained.

(9) 100 % + 25 % = 125 %;
\$6000 ÷ 1.25 = \$4800, cost of the first farm;
100 % — 25 % = 75 %;
\$6000 ÷ .75 = \$8000, cost of the second farm;
\$8000 + \$4800 = \$12800;
\$6000 × 2 = \$12000;
\$12800 — \$12000 = \$800 loss, Ans.

650 ÷ 1.10$\frac{2}{3}$ = \$587.34+, Ans.

(5.) Amt. of \$1 for 2 y. 7 m. 15 d. = \$1.1575;
347.25 ÷ 1.1575 = \$300, Ans.

(6.) Amt. of \$1 for 2 y = \$1.12;
672 ÷ 1.12 = \$600, present worth;
\$672 — \$600 = \$72, discount, Ans.

(7.) Amt. of \$1 for 93 days = \$1.0155;
350.75 ÷ 1.0155 = \$345.396+;
\$350.75 — \$345.396+ = 5.36+, Ans.

(8.) Amt. of \$1 for 2 y. 3 m. 20 d. = \$1.161$\frac{7}{18}$;
750 ÷ 1.161$\frac{7}{18}$ = \$645.77+;
\$750 — \$645.77+ = \$104.23+, Ans,

(ART. 304, p. 215.)

(9.) Amt. of \$1 for 2 y. at 8 %, = \$1.16;
1114.18 ÷ 1.16 = \$960.50, Ans.

(10.) Amt. of \$1 for 66 d. at 7 % = \$1.012$\frac{5}{6}$;
3641.20 ÷ 1.012$\frac{5}{6}$ = \$3595.06+, Ans.

(11.) Amt. of \$1 for 123 d. at 6 % = \$1.0205;
145.67 ÷ 1.0205 = \$142.743+, Ans.

(12.) Amt. of \$1 for 3 y. 3 m. 9 d. at 5 % = \$1.16375;
4748.10 ÷ 1.16375 = \$4080, Ans.

APPLICATIONS.

(PAGE 215.)

(1.) Amt. of \$1 for 9 m. = \$1.045;
385 ÷ 1.045 = \$368.42, Ans.

(2.) \$1050 × .05 = \$52.50, interest;
1050 ÷ 1.05 = \$1000, present worth;
\$1050 — \$1000 = \$50, discount;
\$52.50 — \$50.00 = \$2.50, Ans.

(3.) \$1986.48 ÷ 1.025 = \$1938.02, the present worth of \$1986.48;
\$1938.02 — \$1831.53 = \$106.49, Ans.

(4.) \$230 ÷ 1.0525 = \$218.52, the present worth of \$230;
\$225 — \$218.52 = \$6.48, gain, Ans.

BANK DISCOUNT.

(ART. 308, pp. 216-218.)

(2.) Int. of \$600 for 60 d. = \$6.00
" " " " 3 " " .30
Bank discount = \$6.30
\$600 — \$6.30 = \$593.70, proceeds.

(3.) The time when due = the last day of April, or April 30th + 3 days of grace = May 3d.
Int. of \$250 for 60 d. = \$2.50
" " " " " " 2.50
" " " " 3 d " .125
Bank discount at 6 % a year — \$5.125
At 1 % a month, or 12 % a year, = 2 times \$5.125 = \$10.25; \$250 — \$10.25 = \$239.75, proceeds.

(4.) 4 months after July 5th = Nov. 5; Nov. 5 + 3 days of grace = Nov. 8th, time it is due. From Sept. 5 to Nov. 8 = 2 m. 3 d., time to run.
Int. of \$1650.40 for 60 days = \$16.504
" " " " 3 " " .825
" or bank discount, at 6 % = \$17.329
\$17.329 + $\frac{1}{6}$ of \$17.329 = \$20.217, bank discount, at 7 %; \$1650.40 — \$20.217 = \$1630.183, proceeds.

(5.) 90 days after June 10 = Sept. 8th; and 3 days of grace = Sept. 11th, time due.
Time from July 13th to Sept. 11th = 60 days, time to run;
Int. of \$5000 for 60 days = \$50; \$5000 — \$50 = \$4950, proceeds.

(ART. 309, p. 218.)

(2.) Proceeds of \$1 for 4 m. 3 d. = \$.959;
239.75 ÷ .959 = \$250.00, Ans.

(3.) Proceeds of \$1 for 63 days = \$.9895;
593.70 ÷ .9895 = \$600, Ans.

(4.) Proceeds of \$1 for 93 days at 7 % = \$.981$\frac{11}{12}$;
3755 ÷ .981$\frac{11}{12}$ = \$3824.15, Ans.

(5.) Proceeds of \$1 for 2 m. 3 d. at 2 % a month = \$.958;
576 ÷ .958 = \$601.25, Ans.

(6.) Proceeds of \$1 for 33 days = \$.9945;
994.50 ÷ .9945 = \$1000, Ans.

ANNUAL INTEREST.

(PAGES 219, 220.)

(2.) Int. of \$500 for 3 y. = \$90.00
" " " " 1 y. = \$30
" " \$30 " 2 y. + 1 y., or for 3 years = 5.40
\$95.40

\$500 + \$95.40 = \$595.40, Ans.

(3.) Int. of \$200 for 2 y. 6 m. 3 d. = \$30.10;
" " " " 1 y. = \$12; and
" " \$12 for 1 y. 6 m. 3 d. + 6 m. 3 d. = 2 y. 6 d.
= \$1.45+;
\$30.10 + \$1.45 = \$31.55+, Ans.

(4.) Int. of \$780 for 4 y. 2 m. = \$195;
" " " " 1 y. = \$46.80;
" " \$46.80 for 3 y. 2 m. + 2 y. 2 m. + 1 y. 2 m. + 2 m. = 6 y. 8. m. = \$18.72;
\$195 + \$18.72 = \$213.72;
\$780 + \$213.72 = 993.72, Ans.

(5.) Int. of \$1000 for 2 y. 6 m. = \$175;
" " " " 1 y. = \$70;
" " \$70 for 1 y. 6 m. + 6 m. = 2 y. = \$9.80;
\$175 + \$9.80 + \$1000 = \$1184.80, Ans.

PARTIAL PAYMENTS.

			320.00
	New principal,		$140.97
	Int. to May 1, 1866,		2.82
	Amount due May 1, 1866,		$143.79

(3.)	Principal,	$2400.00
	Int. for 1 y. at 7 %,	168.00
	Amount,	$2568.00
	Payment,	400.00
	New principal,	$2168.00
	Int. from Aug. 16, 1865, to Nov. 30, 1866,	195.60
	Amount,	$2363.60
	Payment,	67.89
	Balance due,	$2295.71

(4.)	Principal,		$5660.00
	Int. for 1 y. 1 m. 15 d.		318.37
	Amount,		$5978.37
	1st Payment,		578.33
	New principal,		$5400.04
	Int. from June 16, 1864, to June 16, 1866,		540.00
	Amount,		$5940.04
	Payments, $160 + $420,		580.00
	New principal,		$5360.04
	Int. from June 16, 1866, to Feb. 16, 1867,		178.67
	Balance due,		$5538.71

(ART. 315, p. 225.)

(1.)	Principal,		$1000.00
	Int. for 1 y.		60.00
	Amount,		$1060.00
	1st payment,	$100	
	Int. from Jan. 1, to July 1, 1865,	3	
			103:00
	New principal,		$957.00
	Int. from July 1, 1865, to Sept. 1, 1866,		66.99
	Amount,		$1023.99
	2d payment,		223.99
	New principal,		$800.00
	Int. from Sept. 1, 1866, to Jan. 1, 1867,		16.00
	Amount,		$816.00
	3d payment,		12.00
	Balance due Jan. 1, 1867,		$804.00

(ART. 316, pp. 224, 225.)

(1.)	Principal,		$5000
	Int. to June 1, 1869, 1 y. 6 m.	$450	
	1st payment,	400	
	Balance of int.	$50	
	Int. of prin. from June 1, to Dec. 1, 1869,	150	200
	Amount,		$5200
	2d payment,		2200
	New principal,		$3000
	Int. from Dec. 1, 1869, to June 1, 1870,		90
	Amount due,		$3090

(2.)	Principal,			$1000.00
	Int. on $1000 from Oct. 1, 1862, to Oct. 1, 1865,		$60.00	
	Int. on $60 from Oct. 1, 1863, to Oct. 1, 1864,		3.60	
	Int. on $1000 from Oct. 1, 1863, to Oct. 1, 1864,		60.00	
	Unpaid interest,		$123.60	
	1st payment,	$50.00		
	Int. on $50,	1.50	51.50	
	Balance of int. Oct. 1, 1864,		$72.10	
	Int. on $72.10 from Oct. 1, 1864, to Oct. 1, 1865,		4.33	
	Int. on $1000 from Oct. 1, 1864, to Oct. 1, 1865,		60.00	
	Unpaid int. Oct. 1, 1865,			$136.43
	Amount,			$1136.43
	2d payment,		$400	
	Int. on $400 for 4 mo.		8	
	3d payment,		200	
	Int. on $200 for 2 mo.		2	610.00
	Balance due Oct. 1, 1865,			$526.43

COMPOUND INTEREST.

(ART. 318, p. 227.)

(2.)	Principal,	$100.00
	Int. for 1 year	6.00
	Amount, or 2d principal,	$106.00
	Int. for 2d year,	6.36
	Amount,	$112.36
	Int. for 3d year.	6.741
	Amount,	$119.101
(3.)	Principal,	$600.50
	Int. for 1st year,	30.025
	Amount, or 2d principal,	$630.525
	Int. for 2d year,	31.526
	Amount, or 3d principal,	$662.051
	1st principal,	600.50
	Compound interest,	$61.551
(4.)	Principal,	$300.00
	Int. for 1st year,	21.00
	Amount, or 2d principal,	$321.00
	Int. for 2d year,	22.47
	Amount, or 3d principal,	$343.47
	Int. for 3d year,	24.042
	Amount, or 4th principal,	$367.512
	Int for 4 m. 15 d.,	9.647
	Amount,	$377.159
	1st principal,	300.00
	Compound interest,	$77.159

(5.)	1st principal,	$860.00
	Int. for 6 months,	34.40
	Amount, or 2d principal,	$894.40
	Int. for 2d 6 months,	35.776
	Amount, or 3d principal,	$930.176
	Int. for 3d 6 months,	37.207
	Amount, or 4th principal,	$967.383
	Int. for 4th 6 months,	38.695
	Amount, or 5th principal,	$1006.078
	Int. for 5th 6 months,	40.243
	Amount, or 6th principal,	$1046.321
	Int. for 6th or last 6 months,	41.852
	Amount,	$1088.173

(6.)	1st principal,	$500.00
	Int. for 1st year,	25.00
	Amount, or 2d principal,	$525.00
	Int. for 2d year,	26.25
	Amount, or 3d principal,	$551.25
	Int. for 3d year,	27.562
	Amount, or 4th principal,	$578.812
	Int. for 4th year,	28.940
	Amount, or 5th principal,	$607.752
	Int. for 2 m. 15 d.,	6.33+
	Amount,	$614.08+

(ART. **319**, pp. **228**, **229**.)

(8.) Amount of \$1 for 20 years at $2\frac{1}{2}$ % = \$1.638616;
\$1.638616 × 100 = \$163.86+, Ans.

(9.) Amount of \$1 for 20 years = \$3.869685;
Amount of \$1 for 10 years = \$1.967151;
\$3.869685 × 1.967151 = \$7.612254;
\$7.612254 × 50 = \$380.61+, Ans.

REVIEW EXERCISES.

(PAGE 229.)

(1.) $5400 × .03 = $162;
$5400 + $162 = $5562, Ans.

(2.) Time = 1 y. 5 m. 1 d.;
Int. of $1 = .085$\frac{1}{6}$;
$250 ÷ .085$\frac{1}{6}$ = $2935.42+, Ans.

(3.) At 1 % it will double itself in 100 years;
100 ÷ 14$\frac{2}{7}$ = 7 %, Ans.

(4.) Int. of $250 for 1 year = $15;
65 ÷ 15 = 4$\frac{1}{3}$ years = 4 y. 4 m.;
July 15, 1866 — 4 y. 4 m. = March 15, 1862, Ans.

(5.) $800 ÷ 1.203 = $665, present worth;
$800 — 665 = $135, true discount;
Int. of $800 for 3. y. 4 m. 21 d. = bank discount = $162.80; $162.80 — $135 = $27.80+, Ans.

(6.) Present worth of $220, due 2 years hence, at 6 % = $196.42+;
$200 — $196.42 = $3.58+; therefore,
$200 cash in hand is the better offer by $3.58+.

(7.) 6 months after April 10, 1866 = Oct. 10, 1866 = time it is due; or, with 3 days of grace, Oct. 13.
Time from Aug. 11 to Oct. 13 = 63 days;
Int. of $500 for 63 days = $5.25;
$500 — $5.25 = $494.75, proceeds.

(8.)

Compound interest =	$341.21
Annual interest =	340.08
Difference,	$1.13, Ans.

RATIO AND PROPORTION.

PARTNERSHIP.

(ART. 335, pp. 239, 240.)

(2.) $1500 + $1950 + $2100 = $5550;
A receives $\frac{1500}{5550}$, or $\frac{10}{37}$ of $1665 = $450.
B " $\frac{1950}{5550}$, or $\frac{13}{37}$ of $1665 = $585.
C " $\frac{2100}{5550}$, or $\frac{14}{37}$ of $1665 = $630.

(3.) $240 + $360 + $120 = $720;
A receives $\frac{240}{720}$, or $\frac{1}{3}$ of $350 = 116.66\frac{2}{3}$.
B " $\frac{360}{720}$, or $\frac{1}{2}$ of $350 = $175.
C " $\frac{120}{720}$, or $\frac{1}{6}$ of $350 = 58.33\frac{1}{3}$.

(4.) A's share = $\frac{48}{108}$, or $\frac{4}{9}$ of 45 = 20 tons.
B's " = $\frac{36}{108}$, or $\frac{1}{3}$ of 45 = 15 "
C's " = $\frac{24}{108}$, or $\frac{2}{9}$ of 45 = 10 "

(5.) A's share = $\frac{3}{5}$ of $2000 = $1200.
B's " = $\frac{2}{5}$ of $2000 = $800.
$1200 — $800 = $400 for A's services.

(ART. 336, p. 240.)

(6.) $8000 + $12000 = $20000;
A receives $\frac{8000}{20000}$, or $\frac{2}{5}$ of $6000 = $2400.
B " $\frac{12000}{20000}$, or $\frac{3}{5}$ of $6000 = $3600.

(7.) 21 + 17 + 47 = $85;
The first pays $\frac{21}{85}$ of $307 = $75.84+.
" second pays $\frac{17}{85}$, or $\frac{1}{5}$ of $307 = $61.40.
" third pays $\frac{47}{85}$ of $307 = $169.75+.

(8.) $5000 + $3000 + $2500 = $10500;
Wife's share = $\frac{5000}{10500}$, or $\frac{10}{21}$ of $7475 = $3559.52+.
Elder son's sh. = $\frac{3000}{10500}$, or $\frac{2}{7}$ of $7475 = $2135.71+.
Younger son's share = $\frac{2500}{10500}$, or $\frac{5}{21}$ of $7475 = $1779.76+.

(ART. 337, pp. 241, 242.)

(2.) A's \$6000 for 7 mo. = \$42000 for 1 mo.;
B's \$9000 " 5 " = 45000 " " "
C's \$1200 " 4 " = 48000 " " "
Entire stock, \$135000 " " "

A's share = $\frac{42000}{135000}$, or $\frac{14}{45}$ of \$4500 = \$1400.
B's " = $\frac{45000}{135000}$, or $\frac{1}{3}$ of \$4500 = \$1500.
C's " = $\frac{48000}{135000}$, or $\frac{16}{45}$ of \$4500 = \$1600.

(3.) A's \$500 for 18 mo. = \$9000 for 1 month;
B's \$380 " 13 " = 4940 " " "
C's \$270 " 9 " = 2430 " " "
Entire stock = \$16370 " " "

A's share = $\frac{9000}{16370}$, or $\frac{900}{1637}$ of \$818.50 = \$450.
B's " = $\frac{4940}{16370}$ of \$818.50 = \$247.
C's " = $\frac{2430}{16370}$ of \$818.50 = \$121.50.

(4.) 80 sheep for 6 mo. = 480 sheep for 1 month;
40 " " " " = 240 " " " "
Jones's stock = 720 " " " "

100 sheep for 6 mo. = 600 sheep for 1 month;
50 " " " " = 300 " " " "
Smith's stock = 900 " " " "

50 sheep for 6 mo. = 300 sheep for 1 month;
Hall's stock = 300 " " " "

Entire stock = 720 + 900 + 300 sheep = 1920 sheep for 1 month.

Jones pays $\frac{720}{1920}$, or $\frac{3}{8}$ of \$275 = \$103.12$\frac{1}{2}$.
Smith " $\frac{900}{1920}$, or $\frac{15}{32}$ of \$275 = \$128.90$\frac{5}{8}$.
Hall " $\frac{300}{1920}$, or $\frac{5}{32}$ of \$275 = \$42.96$\frac{7}{8}$.

(5.) \$500 for 12 mo. = \$6000 for 1 month;
\$150 " 7 " = 1050 " " "
A's stock = \$7050 " " "

\$600 for 9 mo. = \$5400 for 1 month;
\$400 " 3 " = 1200 " " "
B's stock = \$6600 " " "

Entire stock = \$7050 + \$6600 = \$13650.

A's share = $\frac{7050}{13650}$, or $\frac{47}{91}$ of \$682.50 = \$352.50.
B's " = $\frac{6600}{13650}$, or $\frac{44}{91}$ of \$682.50 = \$330.

(6.) A's \$35000 for 2 mo. = \$70000 for 1 month;
" 24000 " 3 " = 72000 " " "
" 20000 " 2 " = 40000 " " "
" entire stock = \$182000 " " "

B's \$11000 for 5 mo. = \$55000 for 1 month.
C's \$4000 for 2 mo. = \$8000 for 1 month.

Entire stock = 182000 + 55000 + 8000 = \$245000.

A's share = $\frac{182000}{245000}$, or $\frac{182}{245}$ of \$9700 = \$7205.71+.
B's " = $\frac{55000}{245000}$, or $\frac{55}{245}$ of \$9700 = \$2177.55+.
C's " = $\frac{8000}{245000}$, or $\frac{8}{245}$ of \$9700 = \$316.73+.

(7.) S's stock was in trade, 12 mo.;
T's = $\frac{1}{5}$ as much for 10 mo., or the same for $\frac{1}{5}$ of 10 mo., or 2 months;
Y's = $\frac{3}{4}$ as much as for 4 mo., or the same for $\frac{3}{4}$ of 4 mo., or 3 months;
12 mo. + 2 mo. + 3 mo. = 17 months.
S's share = $\frac{12}{17}$ of \$3400 = \$2400.
T's " = $\frac{2}{17}$ of \$3400 = \$400.
Y's " = $\frac{3}{17}$ of \$3400 = \$600.

EQUATION OF PAYMENTS.

(ART. 341, p. 243.)

(2.)
2 mo. × 500 = 1000 months;
5 " × 1000 = 5000 "
8 " × 1500 = 12000 "
3000) 18000 "
6 months, Ans.

(3.)
0 days × 1600 = 0 days;
90 " × 800 = 72000 "
2400) 72000
30 days, Ans.

(4.)
3 mo. × 40 = 120 months;
5 " × 60 = 300 "
10 " × 100 = 1000 "
200) 1420 "
$7\frac{1}{10}$ mo. = 7 months, 3 days.
March 1 + 7 mo. 3 days = Oct. 4, Ans.

(5.)
30 days × 200 = 6000
60 " × 150 = 9000
90 " × 300 = 27000
650) 42000
$64\frac{8}{13}$, reckoned 65 days.
May 16 + 65 days = July 20, Ans.

(ART. 342, pp. 244, 245.)

(1.)
Due Aug. 31, 0 days × 1000 = 0 days;
" Sept. 1, 1 " × 200 = 200 "
" " 19, 19 " × 600 = 11400 "
1800) 11600
6 days+.
Aug. 31 + 6 days = Sept. 6, Ans.

(3.) Due April 1, 0 mo. × 1400 = 0 months;
" May 1, 1 " × 500 = 500 "
" June 1, 2 " × 1100 = 2200 "
3000) 2700 "
$\frac{9}{10}$ mo. = 27 days. $\frac{9}{10}$ "
April 1 + 27 days = April 28, Ans.

(4.) Due Jan. 1, 0 days × 735 = 0 days;
" Feb. 20, 50 " × 650 = 32500 "
" " 1, 31 " × 100 = 3100 "
" April 11, 100 " × 200 = 20000 "
1685) 55600 "
33 days nearly.
Jan. 1 + 33 days = Feb. 3, Ans.

(ART. 343, p. 245.)

(5.) Due April 1, 0 days × 1450 = 0 days;
" May 7, 36 " × 1250 = 45000 "
" June 5, 65 " × 850 = 55251 "
3550) 100251 "
28 "
April 1 + 28 days = April 29, the average date;
April 29 + 4 mo. = Aug. 29 = equated time, Ans.

(6.) Due Jan. 15, 0 days × 3750 = 0 days;
" Feb. 10, 26 " × 3000 = 78000 "
" Mar. 6, 50 " × 2400 = 120000 "
" June 8, 144 " × 2250 = 324000 "
11400) 522000 "
46 days nearly.
Jan. 15 + 46 days = Mar. 2 = average date;
Mar. 2 + 6 mo. = Sept. 2 = equated time, Ans.

AVERAGING ACCOUNTS.

(ART. 346, p. 247.)

(2.) Due July 30, 0 days × 550 = 0 days;
" Aug. 14, 15 " × 850 = 12750 "
1400 12750 "
Due July 31, 1 day × 400 = 400 days;
" Aug. 4, 5 " × 300 = 1500 "
700 1900 "
$1400 — $700 = $700 balance;
12750 — 1900 = 10650 days;
10850 ÷ 700 = 16 days nearly.
July 30 + 16 days = Aug. 15, time due, Ans.

(3.) Due Nov. 3, 0 days × 500 = 0 days;
" Dec. 23, 50 " × 600 = 30000 "
1100 30000 "
Due Nov. 13, 10 days × 700 = 7000 days;
1100 — 700 = 400;
30000 — 7000 = 23000 days;
23000 ÷ 400 = 58 days nearly.
Nov. 3 + 58 days = Dec. 31, 1866, Ans.

(4.) Due July 15, 26 days × 300 = 7800 days;
" Aug. 2, 44 " × 50 = 2200 "
" July 31, 42 " × 150 = 6300 "
500 16300 "
Due June 19, 0 days × 200 = 0 days;
" Sept. 17, 90 " × 200 = 18000 "
400 18000 "
800 + 49.60 + 150 = 499.60 — 400 = $99.60, face of the note;
18000 — 16300 = 1700 days;
1700 ÷ 100 = 17 days.
June 19 — 17 days = June 2, Ans.

INTEREST METHOD.

(ART. 352, p. 249.)

(4.) Int. on \$600 for 62 days = \$7.23+.
" " 200 " 0 " = 0
\$800 \$7.23
7.23
\$807.23

Int. on \$700 for 121 days = \$16.46+;
\$700 + \$16.46 = \$716.46;
\$807.23 — \$716.46 = \$90.77, Ans.

(5.) Int. on \$300 for 48 days = \$2.40
" " 50 " 30 " = .25
" " 150 " 32 " = .80
\$500 \$3.45

Int. on \$300 for 64 days = \$3.20
" " 200 " 16 " = .53
\$500 " \$2.67

\$3.45 — \$2.67 = \$.78, Ans.

INTERNAL REVENUE.

(ART. 362, pp. 252, 253.)

(1.) \$600 + \$75 + \$103 + \$2000 + \$47 + \$200 + \$120 + \$251 + \$1000 = \$4396;
\$5800 — \$4396 = \$1404;
\$1404 × .05 = \$70.20;
\$70.20 + \$6.00 + \$1.00 = \$77.20, Ans.

2.)

	$1100
$850	100

$97.70, Ans.	

CUSTOMS.

(ART. 368, p. 254.)

(2.) $5600 × .30 = $1680, Ans.

(3.) 200 × 25 = 5000 kilos.;
5000 × 2.2046 = 11023 lb.;
11023 × .02 = 220.46 lb.;
11023 — 220.46 = 10802.54 lb.;
10802.54 × .05 = $540.127, Ans.

(4.) 6000 × .09 = 540;
6000 — 540 = 5460;
5460 × .20 = $1092, Ans.

(5.) 2240 × 5 = 11200 lb.;
11200 × .22 = $2464;
$2464 × .20 = $492.80, Ans.

DOMESTIC OR INLAND EXCHANGE.

(ART. 377, p. 257.)

(3.) $\$500 \times .99\frac{1}{2} = \$497.50.$
Int. of \$500 for 63 days at 7 % = \$6.125.
\$497.50 — \$6.125 = \$491.37½, Ans.

(4.) $\$1940 \times 1.01\frac{1}{4} = \$1964.25$, Ans.

(5.) $\$920 \times .99\frac{3}{4} = \$917.70.$
Int. of \$920 for 93 days at 8 % = \$19.01.
\$917.70 — \$19.01 = \$898.69, Ans.

(6.) $\$3000 \times 1.01 = \$3030.$
Int. of \$3000 for 2 mo. 3 days = \$31.50.
\$3030 — \$31.50 = \$2998.50, Ans.

(ART. 378, pp. 257, 258.)

(2.) $\$6075 \div \$1.0125 = \$6000$, Ans.

(3.) $\$1.00 - .02 = \$.98.$
Int. of \$1 for 33 days = \$.0055.
\$.98 — \$.0055 = \$.9745;
\$19490 ÷ \$.9745 = \$20000, Ans

FOREIGN EXCHANGE.

(ART. 384, p. 260.)

(2.) £9 = \$40 × 1.08;

$$£1 = \frac{\$40 \times 1.08}{9} = \$480;$$

£2200 = \$4.80 × 2200 = \$10560, Ans

(3.) £9 = \$40 × 1.085;

$$£1 = \frac{\$40 \times 1.085}{9} = \$4.82\tfrac{2}{3};$$

£1173.25 = \$4.82⅔ × 1173.25 = \$5657.67+, Ans.

(5.) 1 florin = \$.40 × 1.01 = \$.404;
2626 florins = \$.404 × 2626 = \$1060.90+, Ans.

(7.) \$500 × 5.14 = 2570 francs, Ans.

(8.) £9 = \$40 × 1.085;

$$£1 = \frac{\$40 \times 1.085}{9} = \$4.82\tfrac{2}{3};$$

\$5657.67 ÷ \$4.82⅔ = £1173¼ = £1173 5s., Ans.

REVIEW EXERCISES.

(PAGES 261, 262.)

(1.) 6 weeks = 42 days;
42 : 3 = 14, Ans.

(2.) 8 : 72 = $\frac{8}{72} = \frac{1}{9}$, Ans.

(3.) 31.65 ÷ 2.11 = 15, Ans.

(4.) 2.11 × 15 = 31.65, Ans.

(5.) $2\frac{2}{3} \div \frac{3}{5} = \frac{40}{9} = 4\frac{4}{9}$, Ans,

(6.) 9 : 10 = $\frac{9}{10}$; 3 : 4 = $\frac{3}{4}$;
$\frac{9}{10} = \frac{18}{20}$; $\frac{3}{4} = \frac{15}{20}$. Therefore, 9 : 10 is the greater.

(7.) (2 × 5 × 1) = 10 : (3 × 7 × 7) = 147;
10 : 147, Ans.

(8.) $155 \times 5 = 775$ miles, Ans.
Or, 12 : 60 : : 155 miles : 775 miles, Ans.

(9.) 803 : 73 : : 22 days : 2 days, Ans.

(10.) The fox gains 2 leaps in making 27 leaps. Therefore, he will make as many times 27 leaps as 2 is found times in $50 = 25$;
And 25 times $27 = 675$, Ans.
Or, as 2 : 50 : : 27 : 675, Ans.

(11.) $\$3000 + \$2000 + \$1000 = \$6000$;
$\$6000 \times .12\frac{1}{2} = \$750$.
A's share $= \frac{3000}{6000}$ or $\frac{1}{2}$ of $\$750 = \$375$.
B's " $= \frac{2000}{6000}$ or $\frac{1}{3}$ of $\$750 = \$250$.
C's " $= \frac{1000}{6000}$ or $\frac{1}{6}$ of $\$750 = \$125$.

(12.) $9 + 7 + 6 + 5 = 27$ letters.
Hendricks' share $= \frac{9}{27}$ or $\frac{1}{3}$ of $\$54000 = \$18000$.
William's " $= \frac{7}{27}$ of $\$54000 = \$14000$.
Arthur's " $= \frac{6}{27}$ of $\$54000 = \$12000$.
Frank's " $= \frac{5}{27}$ of $\$54000 = \$10000$.

(13.) $3\frac{1}{2} : 9\frac{3}{4} : : \$7\frac{1}{8} : \$24.78+$, Ans.
$\frac{3}{4} : \frac{7}{8}$

(14.)
$$\begin{aligned} 9000 \times 12 &= 108000 \\ 10000 \times 9 &= \underline{\ 90000} \\ &\quad\ 198000 \end{aligned}$$

A's share $= \frac{108000}{198000}$ or $\frac{6}{11}$ of $\$1320 = \$720$.
B's " $= \frac{90000}{198000}$ or $\frac{5}{11}$ of $\$1320 = \$600$.

(15.)

$$\begin{aligned} 4 \times 500 &= 2000 \\ 8 \times 1000 &= 8000 \\ 16 \times 1500 &= 24000 \\ 3000) \quad & 34000 \\ & 11\tfrac{1}{3} \text{ months.} \end{aligned}$$

$11\frac{1}{3}$ months = 11 mo. 10 days, Ans.

(16.)

Int. of \$400 for 231 days =	\$15.40
" " 1000 " 60 " =	10.00
\$1400	\$25.40

\$1400 + \$25.40 = \$1425.40.

Int. of \$800 for 273 days =	\$36.40
" " 900 " 123 " =	18.45
\$1700	\$54.85

\$1700 + \$54.85 = \$1754.85;
\$1754.85 — \$1425.40 = \$329.45, Ans.

(17.) \$1500 ÷ 75000 = .02;
\$1200 × .02 = \$24, Ans.

(18.) 15 shillings = $\frac{3}{4}$ of a £;
$\frac{3}{4}$ of \$4.84 = \$3.63, cost of 1 yard in United States money.
\$3.63 × 500 = \$1815;
\$1815 × .30 = \$544.50, Ans.

(19.) £9 = \$40 × 1.095;

$$£1 = \frac{\$40 \times 1.095}{9} = \$4.86\tfrac{2}{3};$$

\$2182.94 ÷ $4.86\frac{2}{3}$ = £448 10s.+, Ans.

EXERCISES IN ANALYSIS.

(PAGES 262-266.)

(2.) $\$735 \div 7 = \$105$, Ans.

(3.) B's share $= \frac{1}{7}$ of $\$1974 = \$282$.
A's " $= \frac{6}{7}$ of $\$1974 = \$1692$.

(5.) $\$60200 - \$35000 = \$25200$.
A's share $= \frac{1}{8}$ of $\$25200 = \$3150$;
B's " $= \frac{2}{8}$ of $\$25200 = \$6300$;
C's " $= \frac{5}{8}$ of $\$25200 = \$15750$.

(6.) $\frac{1}{4} = \frac{3}{12}$; $\frac{1}{3} = \frac{4}{12}$; $\frac{1}{6} = \frac{2}{12}$; rem. $= \frac{3}{12}$.

$\frac{3}{12} \times 2 = \frac{6}{12}$;
$\frac{4}{12} \times 4 = \frac{16}{12}$;
$\frac{2}{12} \times 5 = \frac{10}{12}$;
$\frac{3}{12} \times 6 = \frac{18}{12}$;
$\frac{6}{12} + \frac{16}{12} + \frac{10}{12} + \frac{18}{12} = \frac{50}{12}$;
$\frac{50}{12} \div \frac{12}{12} = 4\frac{1}{6}$ mo. $= 4$ mo. 5 days, Ans.

(8.) March 5, 1866, + 6 mo. = Sept. 5, 1866.

5 mo. $\times$ 200 $=$ 1000 mo.;
1 " $\times \frac{800}{1000} = \frac{800}{1800}$ "

$\$1600 - \$1000 = \$600$;
$\$1800 \div 600 = 3$ months;
Sept. 5 + 3 mo. = Dec. 5, 1866, Ans.

(9.) 4 mo. $\times$ 1500 $=$ 6000 months;
$\$2500 - \$1500 = \$1000$;
$6000 \div 1000 = 6$ months, Ans.

(11.) $19 - 16 = 3$; $51 \div 3 = 17$;
$19 \times 17 = 323$ miles, Ans.

(12.) $2\frac{1}{4}$ miles $\times 2 = 4\frac{1}{2}$ miles A travels before B starts.
9 miles $- 2\frac{1}{4}$ miles $= 6\frac{3}{4}$ miles B gains in 1 hour;
$4\frac{1}{2} \div 6\frac{3}{4} = \frac{2}{3}$ hour $= 40$ minutes $=$ the time B will overtake A.
$\frac{2}{3}$ of 9 miles $= 6$ miles, distance from Boston.

(14.) If 112 sheep are worth 90 colts, 9 colts, or 10 calves $= \frac{1}{10}$ of 112 sheep, 50 calves $= \frac{5}{10}$ of 112 sheep $= 56$ sheep, Ans.

(15.) If 2 women can do the work of 3 boys, 1 woman can do $\frac{1}{2}$ as much as 3 boys, 32 women, or 8 men, can do $\frac{32}{2}$, or 16 times the work of 3 boys, or the work of 48 boys, $\frac{1}{2}$ of 8 men would do the work of 24 boys $= 4$ men, Ans.

(16.) 1 cord of spruce $= \frac{1}{2}$ a cord of oak;
1 " " pine $= \frac{8}{7}$ of $\frac{1}{2}$ a cord of oak $= \frac{8}{14}$;
$\frac{1}{2} + \frac{8}{14} = \frac{15}{14}$.
Therefore, 2 cords of spruce and pine in equal parts $= 1\frac{5}{14}$ cords of oak.
1 cord $= \frac{1}{2}$ of $\frac{15}{14} = \frac{15}{28}$; $60 \div \frac{15}{28} = 112$ cords, Ans.

(18.) 1 man will do the work in 2 times $11\frac{1}{2}$ hours $=$ 23 hours;
1 woman, in 5 times $11\frac{1}{2} = 57\frac{1}{2}$ hours;
1 boy, " 12 " $11\frac{1}{2} = 138$ "
In one hour a man do $\frac{1}{23}$;
A woman, $\frac{1}{57\frac{1}{2}} = \frac{2}{115}$; $\frac{2}{115} \times 2 = \frac{4}{115}$;
A boy, $\frac{1}{138} = \frac{1}{138}$; $\frac{1}{138} \times 3 = \frac{1}{46}$.
$\frac{1}{23} + \frac{4}{115} + \frac{1}{46} = \frac{23}{230}$; $\frac{230}{230} \div \frac{23}{230} = 10$ hours, Ans.

(19.) The carpenter will do $\frac{1}{12\frac{1}{2}}$, or $\frac{2}{25}$ in one day $= \frac{6}{75}$;

" journeyman " " $\frac{1}{18\frac{3}{4}}$, or $\frac{4}{75}$ " " " $= \frac{4}{75}$;

" apprentice " " $\frac{1}{25}$ " " " $= \frac{3}{75}$;

$\frac{6}{75} + \frac{4}{75} + \frac{3}{75} = \frac{13}{75}$; $\frac{75}{75} \div \frac{13}{75} = 5\frac{10}{13}$ days, the time they will do it together.

The carpenter performs $\frac{6}{13}$ of what they all do in one day; hence,

Carpenter will receive $\frac{6}{13}$ of \$325 = \$150.
Journeyman " " $\frac{4}{13}$ " \$325 = \$100.
Apprentice " " $\frac{3}{13}$ " \$325 = \$75.

(2.) 12 c. { 9 c., to gain 1 c. take ⅓ lb.; 10 c., " " " " ½ lb.; 13 c., " lose " " 1 lb.; 14 c., " " " " ½ lb. } × 60 = { 20 lb. 30 lb. 60 lb. 30 lb.

$30 \div \frac{1}{2} = 60.$

(3.) 75 c. { 90 c., to lose 1 c. take $\frac{1}{15}$ lt.; 0 c., " gain " " $\frac{1}{75}$ lt. } × 750 = { 50 lt. 10 lt.

$50 \div \frac{1}{15} = 750.$

(5.) $70 { $60, to gain $1 take $\frac{1}{10}$ of a cow } × 10 = { 1 cow.; $80, " lose " " $\frac{1}{10}$ of a cow } { 1 cow. ; $40, " gain " " $\frac{1}{30}$ of a cow } × 900 = { 30 cows.; $100, " lose " " $\frac{1}{30}$ of a cow } { 30 cows.

$30 \div \frac{1}{30} = 900.$

It is evident, from the operation, that any same number of each of the $60 and $80 kinds may have been taken; hence, there may have been sold 30 each of the several kinds.

(ART. 440, p. 302.)

(2.) 88 c. { 96 c., to lose 1 c. take ⅛ lb.; 90 c., " " " " ½ lb.; 78 c., " gain 1 + 1 c. " ⅕ lb. } × $\frac{4480}{33}$ = { $16\frac{32}{33}$ $67\frac{29}{33}$ $27\frac{5}{33}$

$\frac{1}{8} + \frac{1}{2} + \frac{1}{5} = \frac{33}{40}$; $112 \div \frac{33}{40} = \frac{4480}{33}$.

(3.) 50 c. { 40 c., to gain 2 c. take ⅕ lb.; 60 c., " lose 1 c. " $\frac{1}{10}$ lb.; 70 c., " " " " $\frac{1}{20}$ lb. } × $114\frac{2}{7}$ = { $22\frac{6}{7}$ $11\frac{3}{7}$ $5\frac{5}{7}$

$\frac{1}{5} + \frac{1}{10} + \frac{1}{20} = \frac{7}{20}$; $40 \div \frac{7}{20} = 114\frac{2}{7}$.

(4.) $20\text{ ca.}\left\{\begin{matrix}18\text{ ca., to gain 1 ca. take }\frac{1}{2}\text{ lb.}\\19\text{ ca., " " " " 1 lb.}\\24\text{ ca., " lose 2 ca. " }\frac{1}{2}\text{ lb.}\end{matrix}\right\}\times\frac{1}{2}=\left\{\begin{matrix}\frac{1}{4}\\\frac{1}{2}\\\frac{1}{4}\end{matrix}\right.$

$\frac{1}{2}+1+\frac{1}{2}=2;\ 1\div 2=\frac{1}{2}.$

(5.) $9\text{ c.}\left\{\begin{matrix}7\text{ c., to gain 1 c. take }\frac{1}{2}\text{ lb.}\\8\text{ c., " " " " 1 lb.}\\10\text{ c., " lose " " 1 lb.}\\11\text{ c., " " " " }\frac{1}{2}\text{ lb.}\end{matrix}\right\}\times 30=\left\{\begin{matrix}15\text{ lb.}\\30\text{ lb.}\\30\text{ lb.}\\15\text{ lb.}\end{matrix}\right.$

$\frac{1}{2}+1+1+\frac{1}{2}=3;\ 90\div 3=30.$

(6.) $270\text{ c.}\left\{\begin{matrix}260\text{ c., to gain 1 c. take }\frac{1}{10}\text{ gal.}\\280\text{ c., " lose " " }\frac{1}{10}\text{ gal}\\240\text{ c., " gain 1 c. " }\frac{1}{30}\text{ gal.}\\290\text{ c., " lose " " }\frac{1}{20}\text{ gal.}\end{matrix}\right\}\begin{matrix}\times 10=\left\{\begin{matrix}1\text{ gal.}\\1\text{ gal.}\end{matrix}\right.\\\times 60=\left\{\begin{matrix}2\text{ gal.}\\3\text{ gal.}\end{matrix}\right.\end{matrix}\Bigg\}\times 9=\left\{\begin{matrix}9\text{ gal.}\\9\text{ gal.}\\18\text{ gal.}\\27\text{ gal.}\end{matrix}\right.$

$1+1+2+3=7;\ 63\div 7=9.$

ARITHMETICAL SERIES.

(ART. 445, p. 304.)

(1.) $2\times 4=8;$
$15+8=23$ years, age of oldest, Ans.

(2.) $\frac{1}{3}\times 32=10\frac{2}{3};$
$12+10\frac{2}{3}=22\frac{2}{3}$ cts., Ans.

(3.) $3\times 39=117;$
$1.80-1.17=.63$ cts., Ans.

(ART. 446, pp. 304, 305.)

(1.) $\dfrac{27\frac{1}{2}-5}{11-1}=2\frac{1}{4}$, Ans.

(2.) $\frac{27\frac{1}{2} - 5}{2\frac{1}{2}} + 1 = 11$, Ans.

(3.) $\frac{58 - 3}{5} + 1 = 12$ days, Ans.

(ART. 447, p. 305.)

(1.) $24 + 1 = 25$; $25 \times 24 = 600$;
$600 \div 2 = 300$, Ans.

(2.) $\frac{1}{4} \times 29 = 7\frac{1}{4}$;
$30 - 7\frac{1}{4} = 22\frac{3}{4}$, the distance traveled the thirtieth day.
$30 + 22\frac{3}{4} = 52\frac{3}{4}$; $52\frac{3}{4} \times 30 = 1582\frac{1}{2}$;
$1582\frac{1}{2} \div 2 = 791\frac{1}{4}$ miles, Ans.

(3.) $200 + 2 = 202$; $202 \times 100 = 20200$;
$20200 \div 2 = 10100$ yd. $= 5$ m. 1300 yd., Ans.

GEOMETRICAL SERIES.

(ART. 449, p. 306.)

(1.) $2^7 = 128$; $128 \times 6 = 768$, Ans.

(2.) $(\frac{1}{2})^5 = \frac{1}{1024}$; $4096 \times \frac{1}{1024} = 4$, Ans.

(3.) $(1\frac{1}{2})^{10} = \frac{59049}{1024}$;
$1024 \times \frac{59049}{1024} = \$59049$, Ans.

(ART. 450, p. 307.)

(1.) $768 \div 6 = 128$;
$\sqrt[7]{128} = 2$, Ans.

(2.) $4 \div 4096 = \frac{1}{1024}$;
$\sqrt[5]{\frac{4}{1024}} = \frac{1}{4}$, Ans.

(3.) $6144 \div 3 = 2048$;
$\sqrt[11]{2048} = 2$, Ans.

(ART. 451, p. 307.)

(1.) $128 \times 4 = 512$; $512 - 2 = 510$;
$110 \div 3 = 170$, Ans.

(2.) $2 =$ the rate;
$12 =$ No. of terms;
$2^{11} = 2048$;
$2048 \times 101 = 206848 =$ last term;
$206848 \times 2 = 413696$;
$413696 - 101 = 413595$; $413595 \div 1 = 413595$, Ans.

(3.) $3^{11} = 177147$; $177147 \times 1 = 177147 =$ last term;
$177147 \times 3 = 531441$; $531441 - 1 = 531440$;
$531440 \div 2 = \$265720$, Ans.

ANNUITIES.

(ART. 455, p. 309.)

(2.) The amount of \$200 for 7 years at 6 % = \$284 = last term of the series;
\$284 + \$200 = \$484; \$484 × 4 = \$1936, Ans.

(3.) $450 ÷ 4 = $112.50;
The amount of $112.50 for 10 years and 9 months = $185.06¼ = last term of the series.
$185.06¼ + $112.50 = $297.56¼;
$297.56¼ × 22 = $6546.37½,

(4.) Amount of $450 for 9 years at 7 % = $733.50 = last term of the series;
$733.50 + $450 = $1183.50;
$1183.50 × 5 = 5917.50, Ans.

(ART. 456, pp. 309, 310.)

(2.) The amount of $200 for 4 years at 7 % compound interest = $262.1592;
$262.1592 × 1.07 = $280.5103+;
$280.5103 — $200 = $80.5103; $80.5103 ÷ .07 = $1150.146+, Ans.

(3.) By the table, page 228, the amount of $1 at compound interest for 20 years at 7 % is $3.869685, and for 9 years is $1.838459;
$3.869685 × 1.838459 = $7.1142+;
$7.1142 × 40 = $284.568+;
$284.568 × 1.07 = $304.4877+;
$304.4877 — $40 = $264.4877+;
$264.4877 ÷ .07 = $3778.39+, Ans.

(4.) By the table, the amount of $1 at 3 % compound interest for 20 years = $1.806111, and for 9 years = $1.304773;
$1.806111 × 1.806111 × 1.304773 = $4.256+;
$4.256+ × 50 = $212.80 = amount of $50 for 49 deposits;
$212.81 × 1.03 = $219.1943+; $219.1943 — $50 = $169.1943;
$169.1943 ÷ .03 = $5639.81, Ans.

(ART. 457, p. 310.)

(2.) The amount of an annuity of \$1000 for 4 years at 7 % = 4439.943.
The amount of \$1 for 4 years at 7 % = \$1.310796;
\$4439.943 ÷ 1.310796 = \$3387.207+, Ans.

(3.) The amount of an annuity of \$154 for 19 years at 5 % compound interest = \$4703; and the amount of \$1 at compound interest for 19 years = \$2.52695;
\$4703 ÷ 2.52695 = \$1861,13, Ans.

(4.) 30000 ÷ 5000 = 6, the number of years of the annuity.
The amount of an annuity of \$5000 for 6 years at 6 % compound interest = \$34876.5416+.
The amount of \$1 at 6 % compound interest = \$1.418519.
\$34876.5416+ ÷ \$1.418519 = \$24586.62, Ans.

REVIEW EXERCISES.

(PAGES 310, 311.)

(1.) $11\frac{2}{5} = \frac{57}{5}$;
$\frac{57}{5} \times \frac{57}{5} \times \frac{57}{5} = \frac{185193}{125} = 1481\frac{68}{125}$, Ans.

(2.) $5 \times 5 \times 5 = 125$;
$125 \times 125 = 15625$, Ans.

(3.) $\sqrt{484} = 22$ = the number of dollars per acre, also the number of acres.

(4.) $\sqrt[3]{1953.125} = 12.5$ ft., Ans.

(5.) $\sqrt{841} = 29$, Ans.

(6.) 1 solid ft. = 1728 solid in., and $\frac{1}{2}$ solid ft. = $\frac{1}{2}$ of 1728 solid in. = 864 solid in;
$\frac{1}{2}$ ft. = 6 in; $6^3 = 6 \times 6 \times 6 = 216$ solid in. = a solid $\frac{1}{2}$ ft.;
$864 - 216 \div 648$ solid in. = 3 times 216 solid in. = 3 solid $\frac{1}{2}$ ft., Ans.

(7.) $(\frac{1}{2})^3 : 1^3 :: 4$ hours : 16 hours, the time 1 pipe $\frac{1}{2}$ in. in diameter will fill the cistern, and 2 pipes will fill it in $\frac{1}{2}$ of 16 hours, or 8 hours, Ans.

(8.) To make the gain and loss equal for every 2 lb. he takes of the first kind, he must take 5 lb. of the second.

(9.) $51 - 6 = 45$; $10 - 1 = 9$;
$45 \div 9 = 5$, common difference, and, therefore, the difference between the 9th and 10th.

(10.) $50 \div 2 = 25$;
$26.7 \times 25 = 667.5$ sq. ft. = $74.1\frac{2}{3}$ yd.;
$\frac{1}{5}$ of a dollar = .20;
$74.1\frac{2}{3} \times .20 = \$14.83+$, Ans.

(11.) 10 A. = 1600 sq. rd.;
$\sqrt{1600} = 40$ rd., depth of side;
$40^2 \times 2 = 3200$;
$\sqrt{3200} = 56.55+$ rd., length of diagonal line;
$56.55 \div 2 = 28.27+$ rd., length of rope, Ans.

(12.) $3072 \div 12 = 256$;
$\sqrt[4]{256} = 4$ = the rate;
12 = first term;
$12 \times 4 = 48$ = second term,
$48 \times 4 = 192$ = third term;
$192 \times 4 = 768$ = fourth term;
$768 \times 4 = 3072$ = fifth term.

(13.) Amount of $700 at compound interest for 7 years at 6 % = $1052.54; $924 ÷ 7 = $132.
An annuity of $132 at compound interest for 7 years at 6 % = $1107.98+;
$1107.98 — $1052.54 = $55.44;
Therefore, cash down is most advantageous by $55.44, Ans

EXERCISES IN ANALYSIS.

(PAGES 312–316.)

(2.) $\frac{8}{9}$, $3\frac{3}{7}$, $6\frac{2}{5} = \frac{8}{9}$, $\frac{24}{7}$, $\frac{32}{5} = \frac{280}{315}$, $\frac{1080}{315}$, $\frac{2016}{315}$;
Greatest common divisor of 280, 1080, and 2016 three hundred fifteenths is $\frac{8}{315}$, Ans.

(3.) $\frac{2}{3}$, $\frac{3}{5}$, $\frac{6}{7}$, $\frac{11}{5} = \frac{560}{840}$, $\frac{315}{840}$, $\frac{720}{840}$, $\frac{1848}{840}$.
Greatest common divisor of 560, 315, 720, and 1848 eight hundred fortieths is $\frac{1}{840}$, Ans.

(5.) $\frac{3}{4}$, $\frac{6}{7}$, $\frac{5}{8} = \frac{42}{56}$, $\frac{48}{56}$, $\frac{35}{56}$.
Least common multiple of 42, 48, and 35 fifty-sixths is $\frac{1680}{56} = 30$, Ans.

(6.) Least common multiple of $.75, $.37$\frac{1}{2}$, and 2.06\frac{1}{4}$ = $8.25, Ans.

(8.) $46656 = 2 \times 2 \times 2 \times 2 \times 2 \times 2 \times 3 \times 3 \times 3 \times 3 \times 3 \times 3$;
$2 \times 3 = 6 =$ sixth root, Ans.

(9.) $\frac{125}{686} = \frac{125}{343} = \frac{5 \times 5 \times 5}{7 \times 7 \times 7}$;

$\frac{5}{7}$ cube root; Ans.

(11.) If $\frac{1}{6}$ of the time past midnight $= \frac{2}{3} = \frac{4}{6}$ of the time past noon, $\frac{6}{6}$, or the time past midnight $= \frac{24}{6}$ of the time past noon; hence, the time from midnight to noon, or 12 hours, is $\frac{24}{6} - \frac{6}{6} = \frac{18}{6}$ of the time past noon, and the time past noon must be $\frac{6}{18}$ of 12 hours, or 4 hours;

Therefore, the hour must be 4 o'clock, P. M., Ans.

(12.) If $\frac{1}{2}$ of the time past 10 o'clock A. M. is the time till 10 o'clock P. M., $\frac{1}{2}$ of the time past 10 o'clock A. M. plus $\frac{3}{2}$ of the time past 10 o'clock A. M. is $\frac{4}{2}$, or the time from 10 o'clock A. M. to 10 o'clock P. M., which is 12 hours; then, $\frac{1}{2}$ of the time past 10 o'clock A. M. must be $\frac{1}{3}$ of 12 hours, or 4 hours, and $\frac{3}{2}$ of the time past must equal 8 hours.

Hence, the time must be 6 o'clock P. M., Ans.

(14.) $73 \div 5 = 14\frac{3}{5}$;

$73 \div 8 = 9\frac{1}{8}$;

$73 \div 10 = 7\frac{3}{10}$.

The least common multiple of $14\frac{3}{5}$, $9\frac{1}{8}$, $7\frac{3}{10} = \frac{3020}{40} = 73$ days, Ans.

(15.) $11 \div 2 = 5\frac{1}{2}$, distance A travels in 1 min.;

$17 \div 3 = 5\frac{2}{3}$, " B " " " "

$5\frac{2}{3} - 5\frac{1}{2} = \frac{1}{6}$ rd. B gains in 1 min.;

$135 \div 2 = 67\frac{1}{2}$ rd., distance to gain;

$67\frac{1}{2} \div \frac{1}{6} = 405$ min. = the time they are traveling;

$5\frac{1}{2} \times 405 = 2227\frac{1}{2}$; $2227\frac{1}{2} \div 135 = 16\frac{1}{2}$, the number of times A travels round;

$5\frac{2}{3} \times 405 = 2295$; $2295 \div 135 = 17$, the number of times B travels round.

(17.) At 4 o'clock the hands were 20 spaces apart; therefore, the minute hand must gain 20 spaces. If it gain 55 spaces every time it passes over 60, it will gain 1 minute space in $\frac{1}{55}$ of 60, and 20 spaces in $\frac{20}{55}$ of 60 =
21 min. $49\frac{1}{11}$ sec. past 4 o'clock, Ans.

(18.) The time from Tuesday noon to Sunday at $10\frac{1}{4}$ o'clock A. M. = 4 d. $22\frac{1}{4}$ h. = $4\frac{23}{96}$ d.
3 min. 10 sec. = 190 sec.;
$190 \times 4\frac{23}{96} = 936\frac{7}{8}$ sec. = 15 min. $36\frac{7}{8}$ sec.;
10 min. + 15 min. + $36\frac{7}{8}$ sec. = 25 min. $36\frac{7}{8}$ sec.;
10 o'clock 15 min. + 25 min. $36\frac{7}{8}$ sec. =
10 o'clock 40 min. $36\frac{7}{8}$ sec., Ans.

(20.) Had he worked every day, he would have received 80 times \$.72 = \$57.60. He lost, therefore, \$57.60 + \$12 = \$69.60. Every day he was idle he lost \$.72 + \$.48 = \$1.20.
\$69.60 ÷ \$1.20 = 58 days idle, Ans.

(21.) If he had worked every day, he would have received 25 times \$1.25 = \$31.25;
\$31.25 — \$23.75 = \$7.50.
Every day he was idle he lost \$1.25 + .25 = \$1.50;
\$7.50 ÷ \$1.50 = 5 days idle;
25 — 5 = 20, number of days he worked, Ans.

(23.) \$40 ÷ 8 = \$5. Therefore, B spends \$5 per year more than his income, and \$30 — \$5 = \$25, which is $\frac{1}{8}$ of each one's income.
$\frac{8}{8}$, or the whole income = \$200.
A spends $\frac{7}{8}$ of \$200 = \$175;
B " \$200 + 5 = \$205.

(24.) If they save \$400 in 4 years, in one year they will save \$100. Both incomes = \$800, and if they save \$100, they will both spend \$800 — \$100 = \$700; \$700 — \$40 = \$660.

\$660 ÷ 2 = \$330, B spends.

\$330 + \$40 = \$370 A spends.

(26.) A is entitled to $\frac{1}{2}$, and $\frac{1}{2}$ will remain for B and C.

Therefore, as $1 : \frac{1}{2} :: 60^2 : 1800$;

$\sqrt{1800} = 42.426+$ in., the part remaining after A has ground his share.

$60 - 42.426+ = 17.573+$ in., A's share.

B is entitled to $\frac{1}{4}$, and $\frac{1}{4}$ will remain;

Therefore, as $1 : \frac{1}{4} :: 60^2 : 900$;

$\sqrt{900} = 30$ in.;

$42.426+ - 30 = 12.426+$ in., B's share; and there remains, as C's share, a part 30 in. in diameter.

(27.) Each lady is entitled to $\frac{1}{4}$. After the first has taken her share, $\frac{3}{4}$ will remain;

Hence, as $1 : \frac{3}{4} :: 5^3 : 93.75$;

$\sqrt[3]{93.75} = 4.542+$ in.;

$5 - 4.542 = .45+$ in.;

Therefore, the first lady winds off .45 in.

After the second has taken her share, $\frac{1}{2}$ will remain;

Hence, as $1 : \frac{1}{2} :: 5^3 : 62.5$;

$\sqrt[3]{62.5} = 3.968+$ in.;

$4.542 - 3.968 = 57+$ in.;

Therefore, the second winds off .57 in.

After the third lady has taken her share, $\frac{1}{4}$ will remain;

Hence, as $1 : \frac{1}{4} :: 5^3 : 31.25$,

$\sqrt[3]{31.25} = 3.149+$ in.;

$3.968 - 3.149 = .82$ in. nearly;

Therefore, the third lady winds off .82 in., and there remains, as the fourth lady's share, a part 3.14+ in. in diameter.

MISCELLANEOUS EXERCISES.

(PAGES 317–320.)

(1.) $22515 \div 95 = 237$, Ans.

(2.) $\frac{1}{3}$ of $2 = \frac{2}{3}$;
$\frac{\frac{2}{3}}{3} = \frac{2}{9}$, Ans.

(3.) $\frac{1}{2} + \frac{2}{7} + \frac{1}{6} = \frac{20}{21}$:
$80 \div \frac{20}{21} = 84$, Ans.

(4.) $\frac{2}{3}$ of $\frac{4}{5}$ of $1\frac{1}{2} = \frac{4}{5}$;
And $\frac{4}{5}$ divided by itself will produce 1;
Or, $\frac{4}{5} \times 1 = \frac{4}{5}$, Ans.

(5.) $.1 \times .1 = .01$, Ans.

(6.) 113 A. 145 P. = 18225 P.;
12 A. 10 P. = 1930 P.;
$18225 \div 1930 = 9\frac{171}{386}$, Ans.

(7.) $7' \div 15 = \frac{7}{15}$ min. = 28 sec., Ans.

(8.) 5 m. = 1600 rd.;
3 m. 5 fur. $18\frac{1}{2}$ rd. = $1178\frac{1}{2}$ rd.;
$\frac{1178\frac{1}{2}}{1600} = \frac{2357}{3200}$, Ans.

(9.) 43560 = number of sq. ft. in 1 acre.
$\sqrt{43560} = 208+$ ft., length of one side of an acre;
$208 \div 4 = 52$ spaces.
If the hills occupy simply a mathematical point, and be planted to the edge of the land, there may be 53 rows with 53 hills in a row, or $53 \times 53 =$

2809 hills. But it is to be presumed the hills are planted in the usual manner, so that, by being 4 ft. apart in the square order, there will be $4 \times 4 = 16$ sq. ft. of surface to each hill, and as many hills as 43560 sq. ft. contains times 16 sq. ft., or 2722 hills, Ans.

(10.) 8 miles — 6 miles = 2 miles;
20 hours $\div$ 2 = 10 hours, Ans.

(11.) $3\frac{1}{2} \times 6\frac{1}{4} = 17\frac{5}{8}$; $6\frac{1}{4}$ cu. ft. = 10800 cu. in.;
$10800 \div 17\frac{5}{8} = 493\frac{5}{7}$ in. in length = $41\frac{1}{7}$ ft., Ans.

(12.) $\frac{1}{2}$ of $\frac{1}{2}$ of $\frac{1}{2}$ of $\frac{1}{2} = \frac{1}{16}$;
$\frac{1}{16}$ of 1 gal., or 32 gills = 2 gills, Ans.

(13.) As 1.45 : 1.00 :: 1.00 : $.68\frac{28}{29}$, Ans.

(14.) 100 % — 30 % = 70 %. If 70 % = \$.84, 1 % = \$.012, and 120 % = \$.012 $\times$ 120 = \$1.44, Ans.

(15.) .9325 + .00125 = .93375;
\$540 $\div$ .93375 = $\$578\frac{24}{93}$, Ans.

(16.) If he gave away $\frac{1}{2}$ of an apple more than $\frac{1}{2}$ of the number at the last gate, and had 1 left, he must have had 1 more than twice 1, or 3 at the last gate; and, for like reason, 7 at the second gate; and 15 at the first gate.

(17.) A can do $\frac{1}{3}$ of the work in a day; B can do the work in $\frac{1}{3}$ of 8 days, or $\frac{3}{8}$ of it in one day; C can do the work in $\frac{1}{5}$ of 12 days, or $\frac{5}{12}$ of it in one day;
Hence, they can all do in one day $\frac{1}{3} + \frac{3}{8} + \frac{5}{12} = \frac{37}{24}$;
Then, as $\frac{37}{24} : \frac{24}{24}$ :: 1 day : $\frac{8}{8}$ of a day =
$21\frac{1}{3}$ hours, Ans.

(18.) $\$.15 \div .90 = \$.16\frac{2}{3}$;
40 % of $\$.16\frac{2}{3} = \$.06\frac{2}{3}$;
$\$.16\frac{2}{3} + \$.06\frac{2}{3} = \$.23\frac{1}{3}$, the selling price per pound;
$525 \div .23\frac{1}{3} = 2250$ lb., Ans.

(19.) $\$220 \div .12 = \$1833.33\frac{1}{3}$;
$\$1833.33\frac{1}{3} - \$1575 = \$258.33\frac{1}{3}$, Ans.

(20.) Compound interest of \$300 for 4 years at 6 % = \$78.74+;
Annual interest = \$78.48;
\$78.74+ — \$78.48 = \$.26+, Ans.

(21.) Three months after Jan. 6 = April 6;
The time from March 4 to April 6 = 33 days; and 33 days + 3 days of grace = 36 days, Ans.

(22.) 8 mo. after Jan. 20 = Sept. 20;
Time from June 20 to Sept. 20 = 3 mo.;
Interest of \$40 for 3 mo. and 3 d. at 2 % a mo. = \$2.48;
\$40 — \$2.48 = \$37.52, Ans.

(23.) $\frac{1}{2}, \frac{1}{3}, \frac{1}{4} = \frac{6}{12}, \frac{4}{12}, \frac{3}{12}$;
$\frac{1}{2}$ of $\frac{6}{12} = \frac{3}{12}$;
$\frac{3}{12}$ for 4 mo. = $\frac{1}{12}$ for 1 mo.;
$\frac{3}{12}$ for 13 mo. = $\frac{39}{12}$ for 1 mo.;
$\frac{12}{12} + \frac{39}{12} = \frac{51}{12}$, A's capital for 1 mo.
$\frac{4}{12}$ for 13 mo. = $\frac{52}{12}$, B's capital for 1 mo.
$\frac{3}{12}$ for 13 mo. = $\frac{39}{12}$, C's capital for 1 mo.
$\frac{51}{12} + \frac{52}{12} + \frac{39}{12} = \frac{142}{12}$;
A should receive $\frac{51}{142}$ of \$2840 = \$1020.
B should receive $\frac{52}{142}$ of \$2840 = \$1040.
C should receive $\frac{39}{142}$ of \$2840 = \$780.

(24.) 1 franc = \$.186; \$.186 × 250 = \$46.50;
.20 of \$46.50 = \$9.30;
\$46.50 + \$9.30 = \$55.80, the price in United States money for which it must be sold to gain 20 %.
1 liter = .26417 gal.;
.26417 × 100 = 26.417 gal.;
\$55.80 ÷ 26.417 = \$2.11+, Ans.

(25.) If 6 lb. of coffee = 20 lb. of sugar, 4 lb. of coffee, or 3 lb. of tea = $\frac{2}{3}$ of 20 = $13\frac{1}{3}$ lb. of sugar; and if 3 lb. of tea = $13\frac{1}{3}$ lb. of sugar, 3 times 3 lb., or 9 lb. of tea = 3 times $13\frac{1}{3}$ = 40 lb. of sugar, Ans.

(26.) The express reaches the point in as many hours as 25 is found times in 120 = $4\frac{4}{5}$ hours, or 4 h. 48 min.
It will take the slow train as many times 50 min. as 15 is found times in 120 = 8 times; and 8 times 50 min. = 400 min. = 6 h. 40 min.
The slow train must start as much before 2 as the difference.
6 h. 40 min. — 4 h. 48 min. = 1 h. 52 min.; and 1 h. 52 min. before 2, is 12 o'clock, 8 min., Ans.

(27.) The amount of \$200 for 3 mo. at 6 % = \$203, Ans.

(28.) \$6460 — \$5000 = \$1460.
The interest of \$5000 at 1 % for 4 years = \$200;
\$1460 ÷ \$200 = $.07\frac{3}{10}$ = $7\frac{3}{10}$ %, Ans.

(29.) There will be 16 boards 24 ft. long and 1 ft. wide; and 16 times 24 ft. = 384 ft., Ans.

(30.) 2 × 1.4 × 1 = 2.8 cu. meters;
1 cu. meter = 10 hectoliters;
2.8 × 10 = 28 hectoliters;
28 × 75 = 2100 kilos., Ans.

(31.) $\frac{1}{2} + \frac{1}{3} = \frac{5}{6}$;
Therefore, $\frac{1}{6}$ must remain.
$25 - 5 = 20 = \frac{1}{6}$ of the whole;
$\frac{6}{6} = 120$;
$\frac{1}{2}$ of 120 lb. + 25 lb. = 85 lb. of coffee;
$\frac{1}{3}$ of 120 lb. — 5 lb. = 35 lb. of chicory;
$\frac{35}{120}$, or $29\frac{1}{6}$ % of the whole = chicory, Ans.

(32.) \$144 for 7 mo. = \$1008 for 1 mo.;
$\frac{1}{2}$ of \$144 = \$72;
$\frac{1}{3}$ of \$144 = \$48 for 4 mo. = \$192 for 1 mo.;
\$1008 — \$192 = \$816;
\$72 + \$48 = 120;
\$144 — \$120 = \$24;
816 ÷ 24 = 34 mo. =
2 years, 10 mo., Ans.

(33.) Interest of \$1 for 63 days = \$.0105;
\$1 — \$.0105 = \$.9895;
\$3958 ÷ .9895 = \$4000, Ans.

(34.) 4 meters = 40 decimeters;
3 centimeters = .3 decimeters;
$40 \times 1 \times .3 = 12$ cu. decimeters;
1 liter = 1 cu. decimeter;
12 liters = 12 cu. decimeters;
12 liters will weigh 12 kilos.;
$12 \times 7.8 = 93.6$ kilos., Ans.

(35.) $3^2 \times 3 : 6^2 :: 3$ h. : 4 h., the time 3 pipes 3 in. in diameter will discharge the same amount of water as 1 pipe 6 in. in diameter; and the three pipes will discharge 3 times the quantity in 3 times 4 h., or in 12 h., Ans.

(36.) The interest of \$600 for 3 mo. and 20 d. at 7 % = \$12.83;
\$600 — \$12.83 = \$587.17, Ans.

(37.) The cat gains 2 ft. every quarter of an hour, except the last, when she gains an additional 2 ft. This deducted from 24 ft. = 22 ft. The cat will be as many quarters of an hour catching the mouse as 2 is found times in 22, or 11 qr. = $2\frac{3}{4}$ h., Ans.

(38.) $40^2 = 1600$;
$36^2 = 1296$;
$1600 + 1296 = 2896$;
$\sqrt{2896} = 53.81+$ rd., Ans.

(39.) 1 A. 41 rd. = 201 rd.;
$201 \div .7854 = 255.92+$ sq. rd.;
$\sqrt{255.92}+ = 16$ rd. nearly = the diameter of the garden.
$201 - 12 = 189$ rd.;
$189 \div .7854 = 240.64$ sq. rd.;
$\sqrt{240.64} = 15.5+$ rd. = the diameter;
$16 - 15.5 = .5+$ rd. = 8 ft.+;
8 ft. $\div$ 2 = 4 ft., width of the walk, Ans.

APPENDIX.

(ART. 464, p. 324.)

(1.)

Principal,		$1000.00
1st payment,	$100.00	
Interest of $1000 from July 1, 1864, to June 1, 1865,	30.00	
Balance to liquidate the principal,		70.00
New principal,		$930.00
2d payment,	$223.99	
Interest of $930 from Jan. 1, 1865, to Sept. 1, 1866,	93.00	
Balance to liquidate the principal,		130.99
New principal,		$799.01
Interest of $799.01 from Sept. 1, 1866, to Dec. 25, 1866,	$15.18	
3d payment,	12.00	
Balance of interest,	$3.18	
Interest of $799.01 from Dec. 25, 1866, to Jan. 1, 1867,	.93	
Sum of interest due,		4.11
Balance of note due Jan. 1, 1867,		$803.12

If the interest of $799.01 be taken from Sept. 1, 1866, to Jan. 1, 1867, instead of from Sept. 1, 1866, to Dec. 25, 1866, and from Dec. 25, 1866, to Jan. 1, 1867, it will be $15.98, and the answer $802.99.

(2.)

Principal,		$700.00
1st payment,	$164.00	
Interest of $164 from Dec. 18, 1864, to Feb. 4, 1865,	1.26	
Amount of payment,	$165.26	
Interest of $700 from Feb. 4, 1864, to Feb. 4, 1865,	42.00	
Balance to liquidate the principal,		123.26
New principal,		$576.74
2d payment,	$200.00	
Interest of $200 from June 24, 1865, to Feb. 4, 1866,	7.33	
3d payment,	120.00	
Interest of $120 from Sept. 11, 1865, to Feb. 4, 1866,	2.86	
Amount of payments,	$330.19	
Interest of $576.74 from Feb. 4, 1865, to Feb. 4, 1866,	34.60	
Balance to liquidate the principal,		295.59
New principal,		$281.15
4th payment,	$60.00	
Interest of $60 from July 5, 1866, to Nov. 28, 1866,	1.43	
Amount of payment,	$61.43	
Interest of $281.15 from Feb. 4, 1866, to Nov. 28, 1866,	13.78	
Balance to liquidate the principal,		47.65
Balance of note, Nov. 28, 1866,		$233.50

(3.)

Principal,		$625.50
1st payment,	$200.00	
Interest of $625.50 from Oct. 1, 1864, to Jan. 1, 1865,	9.38	
Balance to liquidate the principal,		190.62
New principal,		$434.88
Interest of $434.88 from Jan. 1, 1865, to Nov. 1, 1865,	$21.74	
2d payment,	20.00	
Balance of interest,	$1.74	
Interest of 434.88 from Nov. 1, 1865, to Jan. 1, 1866,	4.35	
Sum of interest,	$6.09	
3d payment,	$300.00	
Interest,	6.09	
Balance to liquidate the principal,		293.91
New principal,		$140.97
Interest of $140.97 from Jan. 1, 1866, to May 1, 1866,		2.82
Balance of note due May 1, 1866,		$143.79

(4.)

Principal,			$1000.00
Interest of $1000 for 1 year,		$60.00	
1st payment,	$24.00		
Interest of $24 from April 1, 1866, to Jan. 1, 1867,	1.08		
2d payment,	4.00		
Interest of $4 from Aug. 1, 1866, to Jan. 1, 1867,	.10		
Carried forward,	$29.18	$60.00	$1000.00

Brought forward,	$29.18	$60.00	$1000.00
3d payment,	6.00		
Interest of $6 from Dec. 1, 1866, to Jan. 1, 1867,	.03		
Amount of payments,		35.21	
Balance of interest,		$24.79	
4th payment,	$60.00		
Interest of $60 from Feb. 1, 1867, to Jan. 1, 1868,	3.30		
5th payment,	40.00		
Interest of $40 from July 1, 1867, to Jan. 1, 1868,	1.20		
Amount of payments,		$104.50	
Interest of $1000 from Jan. 1, 1867, to Jan. 1, 1868,	$60.00		
Balance of interest unpaid Jan, 1, 1867,	24.79		
Interest of $24.79 from Jan. 1, 1867, to Jan. 1, 1868,	1.49		
Sum of interests,		$86.28	
Balance to liquidate the principal,			18.22
New principal,			$981.78
Interest of $981.78 from Jan. 1, 1868, to Jan. 1, 1869,		$58.91	
Interest of $58.91 from Jan. 1, 1869, to June 1, 1870,		5.01	
Interest of $981.78 from Jan. 1, 1869, to Jan. 1, 1870,		58.91	
Interest of $58.91 from Jan. 1, 1870, to June 1, 1870,		1.47	
Interest of $981.78 from Jan. 1, 1870, to June 1, 1870,		24.54	
Sum of interests,			148.84
Balance of note June 1, 1870,			$1130.62

APPENDIX.

ANSWERS TO EXERCISES

PROFESSORS AND INSTRUCTORS

ARE RESPECTFULLY INVITED TO EXAMINE

Greenleaf's New Mathematics;

AN ENTIRELY NEW COURSE,

Clear, Comprehensive, Practical, Complete,

For all grades of Learners.

FOR COMMON SCHOOLS.

NEW PRIMARY ARITHMETIC,

NEW ELEMENTARY ARITHMETIC,

OR, NEW INTELLECTUAL ARITHMETIC,

NEW PRACTICAL ARITHMETIC.

For High Schools, Academies, & Colleges.

NEW PRACTICAL ARITHMETIC,

OR, NATIONAL ARITHMETIC,

NEW ELEMENTARY ALGEBRA,

Or, New Higher Algebra.

GEOMETRY AND TRIGONOMETRY.

☞ *EACH BOOK COMPLETE IN ITSELF.*

GREENLEAF'S

NEW PRIMARY ARITHMETIC,

FOR PRIMARY CLASSES.

96 pp. Price 25 Cents.

This new work excels all other FIRST LESSONS in numbers:

1. In the interesting and attractive nature of the *exercises*.

2. In the judicious use of *pictorial illustrations*.

3. In the practical methods of teaching the *tables* of addition, subtraction, &c.

4. In the simplicity of the *inductive processes*.

5. In the number and beauty of its *pictorial illustrations*, which especially adapt it to the popular *Object Method* of instruction.

6. In containing a sufficient number of easy *Slate Exercises* for beginners.

☞ In ordering call for *Greenleaf's New Primary Arithmetic.*

GREENLEAF'S

NEW ELEMENTARY ARITHMETIC,

AN EASY, COMPREHENSIVE COURSE OF

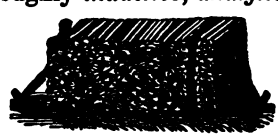
MENTAL AND WRITTEN EXERCISES,

Upon the Productive Plan, for Beginners.

208 pp. 16mo. Price 50 cents.

☞ This *new* work has been prepared expressly to provide for new educational demands. It excels: —

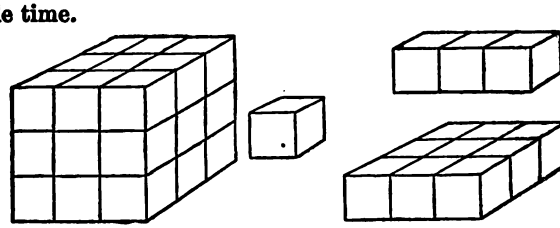
1. In being thoroughly *inductive*, *analytic*, and *practical*.



2. In combining *mental* and *written* exercises, and in applying the same forms of analysis to both.

3. In comprehending the essentials of arithmetic, — the *Fundamental Rules*, *Fractions*, *Analysis*, *Percentage*, and *Simple Interest*, *Metric System of Weights and Measures, etc.*

4. In especial adaptation to the want of pupils whose limited opportunities require that they should learn much in the shortest possible time.



☞ *This book is complete in itself, and, being cheap and comprehensive, is, pre-eminently,*

A BOOK FOR THE TIMES.

GREENLEAF'S
New Practical Arithmetic;

AN ENTIRELY NEW WORK,
FOR SCHOOLS AND SEMINARIES.

324 pp. *Price 90 cents.*

Especial attention is invited to its many

DISTINGUISHING CHARACTERISTICS.

1. *The prominence given to the* ENUNCIATION *of* GENERAL PRINCIPLES, (pp. 13, 18, 26, 35, 44, etc.)

2. *The simple and clear treatment of* NOTATION *and* NUMERATION.

3. *The early introduction of the* DECIMAL POINT, (pp. 15, 16,) *and the explanation of the values expressed by figures at the right of the point*, (p. 52.)

4. EXCHANGE *of* COMMODITIES, BILLS AND INVOICES, ACCOUNTS, LEDGER COLUMNS, (pp. 72, 78,) *and various useful applications*, (pp. 142, 178, 186, 187, 202, 263, 212, etc.)

5. *The discussion* of FACTORING before Multiplication by Factors, (p. 83,) or Division by Factors, (p. 84.)

6. *The simplification* of DIVISION of *Common Fractions*, (p. 117,) *and of* DIVISION *of Decimals*, (p. 139.)

7. The introduction of COMPOUND DENOMINATE NUMBERS, (p. 162,) *after Fractions, so as to avoid at least eight special rules in Reduction, Addition, and Subtraction of Denominate Numbers.*

8. *The* METRIC SYSTEM *of* WEIGHTS *and* MEASURES *is in its proper place, in the body of the work*, (p. 155,) *and references made to the same in subsequent parts of the book*, (pp. 164, 166, 170, 187, 247, 283, etc.,) *as urged by* PROF. NEWTON, *of Yale College*, PRESIDENT HILL, *of Harvard University*, PROF. HENRY, *of Smithsonian Institute*, PROF. ROGERS, *of University of Pennsylvania*, CHANCELLOR CHAUVENET, *of Washington University*, ST. LOUIS, *and others.*

9. *The different cases or problems in* SIMPLE INTEREST *are treated in orderly connection* (pp. 205, 211, 212.)

10. *The improved method of treating* MEDIAL PROPORTION, (p. 298,) and the definite illustration of EVOLUTION, (pp. 276, 277.)

11. *The presentation of important new topics and applications, as the* CENTAL (p. 153,) GOVERNMENT INTEREST, (pp. 205, 210,); Examples of INTEREST AT $7\frac{3}{10}$ *per cent.* (pp. 206, 216,); Annual Interest, (p. 219,); NEW VERMONT INTEREST RULE, INTERNAL REVENUE, (p. 252,); ENGLISH DECIMAL MONEY RECKONING, (p. 258,) *etc.*

12. *The avoiding of all that is* OBSOLETE, *or* EXTRANEOUS, *as Beer Measure*, the *Barley Corn*, *the Nail*, *Old Currencies*, *Duodecimals*, *Permutations*, *Combinations*, *etc.*

13. *The* ANALYTICAL PROCESSES *throughout, making written Arithmetic in all its steps intellectual, never before to the same extent attained in any work.*

14. *The thorough enforcement of educational results, by means of systematic* REVIEW QUESTIONS *and* EXERCISES, (pp. 32, 54, 58, 122, 186, etc.)

TIME SAVING AND LABOR SAVING.

It will be noted that this work with GREENLEAF'S NEW PRIMARY, and NEW ELEMENTARY, or NEW INTELLECTUAL ARITHMETICS, forms a clear, practical, comprehensive system,

COMPLETE IN ONLY THREE BOOKS,

and is believed to be, the *cheapest*, *most convenient* and *productive*, that has ever appeared.

By its use, in comparison with certain *crude*, *overloaded*, and *long spun out* courses, of five or more books, with such catch penny accompaniments, as *Table Books*, *Dictation Cards*, *Books of Principles*, *Keys of Answers*, *Grammar School Editions*, etc., it is safe to say that the learner may not only *make better progress*, but, at least,

SAVE TWO YEARS OF VALUABLE TIME.

GREENLEAF'S

NEW ELEMENTARY ALGEBRA,

FOR COMMON SCHOOLS AND ACADEMIES.

334 pp. Price $1.25.

This *new work* excels all like books:

1. In being simple and easy, yet *comprehensive.*
2. In treating the entire subject *analytically.*
3. In combining *logical clearness* and *exhaustive thoroughness* with *terseness* and *elegant conciseness.*
4. In the numerous *original practical methods.*
5. In the happy manner of treating *discussion of problems, rationalization,* and *radical equations.*

GREENLEAF'S

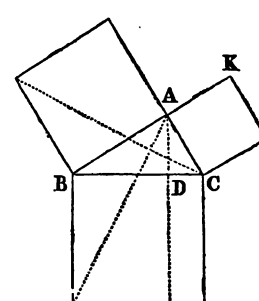
ELEMENTS OF GEOMETRY,

FOR HIGH SCHOOLS AND ACADEMIES.

320 pp. Price $1.25.

Attention is invited to the following considerations concerning this *new* work:

1. Its *arrangement* is the simple and elegant order adopted by LEGENDRE.
2. The *methods of demonstration* are complete, yet simple and concise.
3. The acknowledged improvements of M. DA CUNHA have been carefully incorporated into the work.
4. The *converse* of propositions has been demonstrated in many cases.



5. The Miscellaneous Geometrical Exercises constitute a valuable ture, not often found in an elementary work

GREENLEAF'S

NEW HIGHER ALGEBRA,

FOR HIGH SCHOOLS AND COLLEGES.

394 pp. Price $1.80.

AN ENTIRELY NEW WORK,

Containing many important improvements, and meeting very fully the requirements of the best standard of instruction. Especial attention is invited to

The judicious selection and arrangement of topics.

The brevity and clearness with which the various subjects have been treated—all the essential subjects having been brought within 380 pages.

The character of the examples, especially the exclusion of all such as are calculated to merely puzzle.

The clear treatment of Radicals, Imaginary Quantities, and Binomial Theorem.

The separate discussion of the three methods of completing the square in Quadratic Equations; the separation of equations in the Quadratic Form from true Quadratic Equations; and the classification of Simultaneous Equations.

The treatment of Recurring Series (Art. 378,–381), especially the distinction between the scale of relation of the terms and of the co-efficients; the plan of keeping the co-efficients and variable distinct, and the method of obtaining the sum of the series.

The method of treating Logarithms, especially (Art. 388,–404), and Exponential Equations (Art. 418,–438).

The Statement of the General Properties and Transformation of Equations (Art. 434,–466), and the illustration of each by examples.

☞ **Greenleaf's Treatise on Algebra is a different work.**

GREENLEAF'S

ELEMENTS OF TRIGONOMETRY,

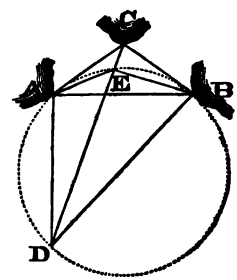
FOR ACADEMIES AND COLLEGES.

170 pp. Price $1.

This is regarded as the most elegant treatise of the kind in the language:

1. The Plane and Spherical Trigonometry forms a complete system, *analytically* treated and *practically* applied.

2. The Trigonometric Functions have been regarded, in accordance with the modern method, as *ratios*, but reference has been made to such points of the old methods as are deemed valuable.



3. The entire work is elementary and progressive, and at the same time *full* and *comprehensive*, containing the most useful applications, with full *tables*.

GREENLEAF'S

GEOMETRY AND TRIGONOMETRY,

For Academies and Colleges.

490 pp. Price $1.75.

GREENLEAF'S

SURVEYING AND NAVIGATION.

IN PREPARATION.

Also, other books of a complete course, to be issued as fast as may be consistent with their careful composition.

CONTINUE TO BE PUBLISHED.

GREENLEAF'S

NEW INTELLECTUAL ARITHMETIC,

FOR ADVANCED CLASSES.

180 pp. Price, 45 cents.

A popular work, including *all the principles and combinations* common to books of the kind, but *carrying analysis further.*

GREENLEAF'S

Common School Arithmetic,

FOR COMMON SCHOOLS AND ACADEMIES.

330 pp. Price, 90 cents.

A *complete system of written* arithmetic, for common schools, containing sufficient to prepare for all ordinary business, *kept up with the times*, and extensively used in all parts of the country.

GREENLEAF'S

NATIONAL ARITHMETIC,

FOR HIGH SCHOOLS AND SEMINARIES.

450 pp. Price, $1.25.

A full and exhaustive course, rich in *problems, original methods*, and *mercantile information*, and much used in Normal Schools, Academies, and Commercial Colleges.

☞ The two preceding books contain a full presentation of the METRIC SYSTEM of WEIGHTS AND MEASURES.

GREENLEAF'S

New Primary, New Intellectual, and New Practical

ARITHMETICS,

AND

Greenleaf's New Elementary Algebra,

were unanimously adopted by the VERMONT STATE BOARD OF EDUCATION, in February, 1867, to be used in all the PUBLIC SCHOOLS of that State, for a term of FIVE YEARS, as required by law.

GREENLEAF'S

ARITHMETICS AND ALGEBRAS

are those most generally adopted for the best schools in

MASSACHUSETTS.

GREENLEAF'S ARITHMETICS constitute the only *complete series* ever *adopted* by a STATE BOARD OF EDUCATION, for the Common Schools of

NEW HAMPSHIRE,

and are now used in nearly all the towns of that State.

GREENLEAF'S SYSTEM

is that *authorized* to be used uniformly in upwards of

FOUR HUNDRED CITIES AND TOWNS IN MAINE.

GREENLEAF'S are *favorite text-books*, and used more than any others in

RHODE ISLAND AND CONNECTICUT.

GREENLEAF'S SERIES is meeting with *increasing favor* in all parts of

NEW YORK.

GREENLEAF'S

NEW COMPREHENSIVE SERIES OF ARITHMETICS,

AND

New Algebras,

having been *approved* for the *Counties* generally, have become the *established standard* in

NEW JERSEY.

GREENLEAF'S ARITHMETICS have been *introduced* in

PENNSYLVANIA

into more districts and are used more uniformly in counties than any others.

GREENLEAF'S MATHEMATICS,

now rendered complete, have a *growing popularity* in all the

WESTERN AND SOUTHERN STATES.

GREENLEAF'S ARITHMETICS AND ALGEBRAS,

are approved text-books for

NORMAL SCHOOLS AND COMMERCIAL COLLEGES,

in all parts of the country.

GREENLEAF'S ARITHMETICS

are now used with satisfaction in the PUBLIC SCHOOLS of

NEW YORK CITY, PHILADELPHIA,

and many other cities.

GREENLEAF'S HIGHER BOOKS

are now used in many leading

COLLEGES AND UNIVERSITIES.

☞ GREENLEAF'S NEW SERIES gained, during a year ending January 25, 1868, a circulation of

75,719 VOLUMES.

NEW SERIES OF ARITHMETICS.

SPEAR & SAWYER'S MERCANTILE COLLEGE,
274 WASHINGTON STREET,
BOSTON, Sept. 18, 1867.

We like GREENLEAF'S NEW PRACTICAL ARITHMETIC. Its definitions and explanations are clear, concise, and up with the times. In the treatment of mercantile topics, we are pleased to observe that the shorter methods of computation have a due degree of prominence. *The complete presentation of the Metric System is gratifying prophecy of the good time coming*, when compound numbers shall no longer be a stumbling-block to students. To the practical teacher, we think the book will commend itself better than any words of ours.

GEORGE A. SAWYER, } Principals.
AARON LOVELL, }

STATE NORMAL SCHOOL, WESTFIELD, MASS., Oct. 16, 1867.

I shall make immediate use of GREENLEAF'S NEW PRACTICAL ARITHMETIC in my classes. In the production of this work valuable service has been rendered to the cause of popular education. In the clearness with which the principles of Arithmetic are stated, in the simplicity of its rules, and in its general adaptation to prepare the pupils in our common schools to apply the principles of numbers in the several departments of business, the book is unsurpassed. The ALGEBRAS are in constant use in our school, and commend themselves.

J. C. GREENOUGH,
Instructor in Arithmetic, and other branches.

FRENCH'S MERCANTILE COLLEGE, 186 WASHINGTON STREET,
BOSTON, Sept. 14, 1867.

During many years GREENLEAF'S ARITHMETICS have been used at this institution, and although many others have been urged for adoption, I have seen no reason to make a change. It is with much satisfaction I have examined the NEW PRACTICAL ARITHMETIC, and shall make immediate use of it.

CHAS. FRENCH, A. M., Principal.

GRAMMAR SCHOOL, No. 35, NEW YORK, Jan. 13, 1867.

Having examined with considerable care GREENLEAF'S NEW PRACTICAL ARITHMETIC, I have concluded to use it in my own school and recommend it to my friends, who are principals of other schools. Its definitions and principles are clear, concise, and accurate; its examples well chosen and in number sufficient to impress the subject on the mind of the scholar. In my examinations and reviews, *I have preferred* GREENLEAF'S ARITHMETIC *as a text-book to all others;* because, in addition to its Mathematical excellence, it is well adapted to all commercial purposes.

THOMAS HUNTER, Principal.

GRAMMAR SCHOOL, No. 40, NEW YORK, Nov. 26, 1866.

GREENLEAF'S NEW PRACTICAL ARITHMETIC, appears to me, to be an improvement on the Common School Arithmetic, which has been in use in this school for many years, in general arrangement, in the presentation of the Metric System of Weights and Measures, and in a very varied set of examples in Mensuration. *The introduction of the Metric System has my warm approval; I envy the school-master of thirty years hence, who by it will be relieved of that stupefying incubus — Denominate Numbers;* and I can almost hear the children of the next generation wondering that we of to day should have wandered in such wilderness so many weary years. No Arithmetics, in my opinion have kept for so long a time, a more deserved share of public favor than Greenleaf's.

DAVID B. SCOTT, Principal.

GRAMMAR SCHOOL, No. 12, 7th Ward,

NEW YORK, Dec. 15, 1866.

GREENLEAF'S NEW PRACTICAL ARITHMETIC, I consider one of *the very best text-books extant.* One valuable feature is its clear and concise exposition of those principles, which underlie arithmetical processes or rules; another is the practical character of its examples; and a third is its adaptation to the present advanced state of the science, and the wants of a business, or commercial community.

J. H. FANNING, Principal

NEW ALGEBRAS.

As a matter of preference, I have for several years used the MATHEMATICAL SERIES of Prof. Greenleaf. With the NEW ELEMENTARY ALGEBRA I am especially pleased.

GEO. GANNETT,
Principal of Pemberton Square School for young ladies, Boston.

We have recently adopted GREENLEAF'S ELEMENTARY ALGEBRA, and like it much. I consider it a thorough, systematic, and compact treatise, — including nothing but Algebra, while it covers sufficient ground to give the pupil a good practical knowledge of the subjects.

T. D. ADAMS,
Principal of High School, Newton, Mass.

I have lately introduced GREENLEAF'S NEW ELEMENTARY ALGEBRA into my school, and it possesses the same characteristics as his Arithmetics. We like it exceedingly.

N. H. MORRISON,
Principal of Young Ladies' Academy, Baltimore.

We have used GREENLEAF'S NEW ELEMENTARY ALGEBRA for three years and find it well adapted to our wants. Greenleaf's Geometry is used in our school with satisfaction.

NATHANIEL HILLS.
Principal of High School, Lynn, Mass.

I have been teaching Algebra for ten years, and believe GREENLEAF'S ELEMENTARY ALGEBRA to be the best work on that subject that has been presented to the American people; also his SERIES OF ARITHMETICS I consider unequalled.

W. W. JAMIESON,
Principal of Classical School, Keokuk, Iowa.

We are now using GREENLEAF'S ELEMENTARY and HIGHER ALGEBRAS, and like them.

H. P. TORSEY,
Principal of Wesleyan Seminary and College, Kent's Hill, Me.

"I highly approve GREENLEAF's New Elementary Algebra. It is a thorough practical treatise, and free from abstruse undefined technicalities, rather enticing than forbidding to the learner; therefore calculated to be a useful work."

SAMUEL ALLEN,
Principal Friends' Corporation School.

The Voice of New York City.

"During late years an unusual number of treatises on Algebra have been published, among which GREENLEAF's New Elementary seems to me to be worthy of particular notice. Like his work on Arithmetic, the matter of his Algebra is well arranged, and embraces all that is usually required in that branch of learning. The rules for solution of examples are plain, concise, and easily understood by students of ordinary capacity, and there is no extraneous matter swelling the book without adding to its utility. The examples are well selected and illustrate the principles involved in every case. I would therefore heartily recommend this Algebra to all who would acquire a complete knowledge of the subject, without encountering difficulties at every step of their progress."

DAVID PATTERSON,
Principal of Grammar School No. 3.

We heartily concur in the above opinion of Dr. Patterson.

H. WILLIAMSON,	Princ. Gram. Sch.	No. 53.	J. H. PARTRIDGE,	Princ. Gram. Sch.	No. 48.

GREENLEAF'S NEW HIGHER ALGEBRA, by its judicious arrangement, and the practical nature of its examples, commends itself to the favor of teachers. The work excels in the mode of presenting the general theory of Equations; and the sections on Variation, Useful Formulas, and the chapter on Radical Quantities are of great practical value.

SELDEN J. COFFIN,
Adjunct Professor of Mathematics, in Lafayette College, Pa.

From the examination of GREENLEAF'S NEW HIGHER ALGEBRA, I am satisfied that it is a work of superior merit, ranking with the best text-books on Algebra in use in the schools of this country. McKENDREE PETTEE,
Professor of Mathematics, University of Vermont, Burlington, Vt.

GREENLEAF'S NEW HIGHER ALGEBRA is comprehensive in its plan, yet the different topics are treated with such admirable conciseness that a large amount of matter is brought within a reasonable compass. Its processes, problems, and exercises are well adapted to secure discipline and expertness.

ISAIAH PECKHAM,
Principal of Public High School, Newark, N. J.

The HIGHER ALGEBRA needs no commendation from me, — it will commend itself. The GEOMETRY and TRIGONOMETRY I have used with two classes, and a third is now completing it. I regard it as a superior work. E. B. JENNINGS,
Principal of Bartlett High School, New London, Ct.

I have used GREENLEAF'S ARITHMETICS and ALGEBRA for several years, and am well acquainted with their points of excellence. I have examined other series, but find none yet equal in all respects to Greenleaf's. WM. ROBINSON,
Principal of Academy, Spring Valley, N. Y.

"I have concluded to supply my class with GREENLEAF'S NEW HIGHER ALGEBRA. We need twenty-nine copies, which please send to my address." J. M. VAN VLECK,

Professor of Mathematics, Wesleyan University, Middletown, Conn

---

"GREENLEAF'S ALGEBRA has been adopted as a text-book in this school. It is now used in several classes, and gives good satisfaction. I most cheerfully recommend the work."

A. P. STONE,

Principal of Public High School, Portland, Me.

"Both of GREENLEAF'S NEW ALGEBRAS are now used in my school, and, I am happy to say, I have never seen works so admirably adapted to the object for which they are intended."

M. C. MITCHELL,

Teacher Public High School, Farmington, Me.

"GREENLEAF'S MATHEMATICS are very valuable works. They meet my *entire* approbation." A. RAMBO,

County Superintendent, Montgomery Co., Pa

"Having examined and used GREENLEAF'S NEW ALGEBRA, I have no hesitancy in pronouncing it the most lucid and attractive work of the kind within my knowledge."

SAMUEL F. LESTER,

Principal of Bryant Seminary, Baltimore, Md.

"I have used GREENLEAF'S ARITHMETICS for several years, and am not at all disposed to change. All things considered, I think, they are superior to any others." D. C. STONE,

Principal of Public School, Marysville, Cal.

"I cannot but think that GREENLEAF'S SERIES will commend itself most fully to impartial minds, as being the best before the public, whether for style, strength, or intrinsic worth. The use of various other text-books upon this science, and Algebras in particular, only inclines me more strongly in favor of these mathematical works." R. B. CLARK,

Principal of Public High School, Fitchburg, Mass.

GREENLEAF'S NEW HIGHER ALGEBRA, in my opinion, is among the very best text-books for a university course.

S. S. GREENE,
Prof. Nat. Phil. and Ast. Brown University, Providence.

Though my name will add nothing to the authority of the foregoing statement, I may express my belief that it is correct.

B. SEARS,
President of Brown University.

The problem in the construction of a text-book is neither to encourage sloth nor to discourage effort; to present the subject so as to make it comprehensible by aiding students, and yet call forth those efforts which education demands. Both of these ends are well secured in GREENLEAF'S HIGHER ALGEBRA. I shall put it on the list of the Algebra to be used here.

J. TATLOCK,
Professor of Mathematics, Williams College, Mass.

Both of GREENLEAF'S NEW ALGEBRAS embrace more that is really worth knowing on the subject than corresponding works by other authors. I have concluded to use the NEW HIGHER.

F. R. BAKER,
Professor of Mathematics, State Agricultural College, Pa.

I have examined GREENLEAF'S NEW HIGHER ALGEBRA, and find it to be well adapted for giving students a knowledge of this branch of mathematical science. The materials are well arranged, and the principles are stated with that precision so necessary to a perfect comprehension of the subject. Z. HOPPER,
Prof. of Mathematics, Central High School, Philadelphia.

I have examined GREENLEAF'S NEW HIGHER ALGEBRA, and am free to say that it is calculated to meet the requirements of *the highest standard* of mathematical instruction in the best High Schools and Seminaries. BROTHER PATRICK,
President of Manhattan College, New York.

Geometry and Trigonometry.

"We have now a large class in GREENLEAF'S Geometry. I am satisfied that it possesses many excellences."

J. C. GREENOUGH,
State Normal School, Westfield, Mass.

"The greatest care has evidently been taken with the style of the Geometry. After a careful search, we have not been able to find one expression which we felt sure could be improved."

J. D. RUNKLE,
U. S. Nautical Almanac Establishment.

"I know of no handsomer treatise on Trigonometry than GREENLEAF'S; it much surpasses other authors on the subject."

B. L. LANG,
Kenyon College, Gambier, Ohio.

"I esteem GREENLEAF'S Trigonometry most highly, as being the ONLY text-book of the kind which presents, in a form suitable for High Schools, the improved methods of the present day."

WILLIAM C. ESTY,
Professor of Mathematics, Amherst College, Mass.

"I do not hesitate to say that GREENLEAF'S Geometry is simple, exact, and complete." BROTHER PATRICK,
President of Manhattan College, New York.

"GREENLEAF'S Trigonometry is a work of great excellence. Its merits consist in the adoption of the method of *ratios*, and the presentation of it with unusual simplicity and clearness."

EDWARD BROOKS,
Professor of Mathematics, State Normal School, Millersville, Pa.

"The Geometry and Trigonometry now meets all the wants of the teacher and pupil in that department of study. I can cheerfully recommend it as worthy of trial, and in the hands of a good teacher as sure of success. It stands the test of the school-room well — the only sure guaranty of the merits of any school-book."

A. P. STONE,
Late President American Institute of Instruction.

GREENLEAF'S NEW SERIES

is the only COMPLETE one, which, by force of intrinsic merit, has been sufficiently introduced in all parts of the country, to have become

A NATIONAL STANDARD.

A desirable uniformity, so far as ARITHMETICS are concerned, already exists in so many cities and towns, upon Greenleaf's well-tried system, that every inducement exists, it is believed, for a systematic effort to effect upon it, in every town and district,

AN ENTIRE UNIFORMITY.

In order that this may be the more readily accomplished, the publishers agree to furnish the several books of Greenleaf's New Series, in exchange for the old books by other authors, or for old editions of Greenleaf's, of corresponding grade, at about one half the wholesale prices.

New Primary Arithmetic,
New Elementary Arithmetic,
New Intellectual Arithmetic,
New Practical Arithmetic,

New Elementary Algebra,
New Higher Algebra,
Elements of Geometry,
Geometry and Trigonometry.

SCHOOL BOARDS AND TEACHERS,

Who have seen the vast injury that has been done to education, by the introduction of "specious novelties," or "ephemeral works," and who would avoid the expense of frequent changes, will find

Greenleaf Standard and Enduring.

☞ SINGLE SPECIMEN BOOKS of the SERIES forwarded, *postage prepaid*, when desired for examination, with a view to introduction, at 15, 30, 30, 60, 80, 120, 100, and 120 cents, respectively.

☞ Correspondence of those contemplating changes is solicited.
